**Iqaluit, Nunavut
Monday, September 13, 2021**

Members Present:

Hon. David Akeagok, Mr. Tony Akoak, Hon. Jeannie Ehloak, Hon. George Hickes, Hon. David Joanasie, Mr. Joeline Kaernerck, Mr. Pauloosie Keyootak, Hon. Lorne Kusugak, Mr. Adam Lightstone, Mr. John Main, Hon. Margaret Nakashuk, Mr. Patterk Netser, Mr. Calvin Pedersen, Mr. David Qamaniq, Mr. Emiliano Qirngnuq, Hon. Allan Rumbolt, Hon. Joe Savikataaq, Mr. Craig Simailak, Ms. Cathy Towtongie.

>>*House commenced at 13:29*

Item 1: Opening Prayer

Speaker (Hon. Allan Rumbolt): Before we begin, I would like to ask Mr. Netser if he would lead us in prayer, please. Mr. Netser.

>>*Prayer*

Speaker: Thank you, Mr. Netser. Before we begin, I would like to wish a warm welcome to our veteran page, Alexis, who will assist us all this week. Welcome.

>>*Applause*

Good afternoon, members. Good afternoon to the people of Sanikiluaq and the people of Nunavut, and who else may be watching our proceedings today.

Orders of the day. Ministers' Statements. The Acting Minister for our Government House Leader, the Hon. Minister Kusugak.

Item 2: Ministers' Statements**Minister's Statement 677 – 5(2):
Minister Absent from the House**

Hon. Lorne Kusugak (interpretation): Good day, Mr. Speaker and my colleagues. I wish to inform you today that our colleague, (interpretation ends) Hon. Elisapee Sheutiapik, (interpretation) will be absent from the House for personal reasons. Thank you, Mr. Speaker.

Speaker: Thank you. Ministers' Statements. The Hon. Premier, Mr. Savikataaq.

**Minister's Statement 678 – 5(2): 2021
Council of the Federation Literacy
Award Winner**

Hon. Joe Savikataaq (interpretation): Thank you, Mr. Speaker. To the people of Arviat, I say "good day" to you.

(interpretation ends) Mr. Speaker, I would like to take this opportunity to speak about the accomplishments and commitment Nunavut's 2021 Council of the Federation Literacy Award recipient, Nunia Anoe of Arviat.

Nunia is no stranger to the world of learning. With over 30 years of experience from teaching elementary school to high school, to developing Inuktitut curriculum for the Department of Education, Nunia is passionate about promoting Inuktitut to students across Nunavut.

Mr. Speaker, while her studies and work have taken her to different communities across the territory, she recognizes the importance of learning different dialects of Inuktitut to facilitate more meaningful communication with elders, community

members, students and family. Nunia is dedicated to meeting students where they are at and helping strengthen students' Inuktitut language skills at all ages, and she encompasses all the qualities of a leader of literacy promotion. Nunia currently works as an elementary school teacher at Levi Angmak Elementary School in Arviat.

Mr. Speaker, since 2004 the Council of the Federation has celebrated achievement, innovation, and excellence in literacy. This annual award is presented to in each province and territory to celebrate the valuable contributions made by Canadians in the field of literacy.

Mr. Speaker and colleagues of the Legislative Assembly, please join me in congratulating Nunia. Thank you for your work. I look forward to presenting your medallion, cheque, and certificate as soon as I'm back in Arviat. Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Ministers' Statements. The Hon. Minister responsible for the Nunavut Housing Corporation, Minister Nakashuk.

**Minister's Statement 679 – 5(2):
Federal Funding Initiatives**

Hon. Margaret Nakashuk
(interpretation): Good afternoon, my colleagues. I also say "good day" to the people of Pangnirtung.

(interpretation ends) Mr. Speaker, I come here today with good news. The Canadian Mortgage and Housing Corporation (CMHC) has provided

additional funding for Nunavut through two separate funding programs.

The Rapid Housing Initiative will provide \$4.9 million to build 15 new units in Gjoa Haven and Kugluktuk. The Canadian Mortgage and Housing Corporation compromised its program criteria to meet Nunavut's unique needs and extended the construction timeline to two years and allowed us to use the funding for stick builds. Without these accommodations, our unique logistical challenges would have made accessing these funds challenging if not impossible.

The Canadian Mortgage and Housing Corporation has introduced the Canada Nunavut Housing Benefit, a National Housing Strategy initiative intended to provide a rent subsidy to ease hardship by facilitating access to housing on the private market for individuals, youth, or families who are experiencing vulnerability or crisis. This is a joint investment of \$18 million to support over 670 low-income households. The Nunavut Housing Corporation will administer these funds with the Department of Family Services.

Mr. Speaker, the funds align with the Government of Nunavut's *Turaaqtavut* mandate goals of Inuusivut: Self-reliance, and Piliqatigiinniq/Ikajuqtiigiinniq: Working together for a common cause. (interpretation) Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Ministers' Statements. The Hon. Minister responsible for Nunavut Arctic College, Minister Joanasie.

**Minister's Statement 680 – 5(2):
Nunavut Teacher Education
Program**

Hon. David Joanasié (interpretation):
Thank you, Mr. Speaker. Good day,
members and Nunavummiut.

Mr. Speaker, I would like to update the
members on the Pathfinder agreement
and the expansion of the Nunavut
Teacher Education Program.

Mr. Speaker, in addition to securing
funding from the Nunavut
Implementation Panel, I can confirm that
the college has signed a \$37.3 million
contribution agreement with the federal
government. This funding is
foundational to the success of this
program's expansion and will fund a
range of activities related to curriculum
development and program delivery,
oversight, and leadership.

(interpretation ends) Mr. Speaker, I can
also confirm that at its August 30
meeting in Kinngait, the Makigiaqta
Board of Directors approved \$12.4
million to the Pathfinder project,
securing funding for three years,
beginning in fiscal year 2023 to 2026.
This is a historic commitment, an
opportunity for actioning on the intent of
this organization, which is to provide
funding and supports for training
initiatives. I applaud Makigiaqta for
making such an important investment
into language, culture, and post-
secondary education in the territory.

(interpretation) Mr. Speaker, as members
will recall, the four-year Nunavut
Teacher Education Program is rooted in
a two-year immersive Inuktut program,
the Uqariuqsatittijit Initiative. I am

proud to recognize the communities of
Arviat, Baker Lake, Naujaat, and
Igloolik who are hosting the first cohort
of this expansion. I can confirm that 44
students have been accepted into the
program in these communities. I know I
speak on behalf of all of Nunavut when I
say thank you for doing your part to
support Inuktut in Nunavut's education
system, we believe in you and wish you
every success in the program.

(interpretation ends) Mr. Speaker, these
four communities join Iqaluit,
Cambridge Bay, and Rankin Inlet who
are also hosting a new cohort of the
Nunavut Teacher Education Program. I
can confirm that across Nunavut, a total
of 91 Nunavummiut will begin learning
in this important program.

Mr. Speaker, in closing, I want to
recognize the Government of Nunavut's
Department of Culture and Heritage, the
Department of Education, and Nunavut
Tunngavik Incorporated, who sat with
the college on the Partnership Table on
Education and Language. I would also
like to recognize the Makigiaqta Board
of Directors, which include
representatives from Nunavut
Tunngavik, the three regional Inuit
organizations, and the Government of
Nunavut. These milestones are a direct
result of the various levels of
representation actioning on their
commitment to strengthening learning in
Inuktut for a bilingual education system
for Nunavut. This is a success for all of
Nunavut and I applaud the efforts of
everyone. Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Ministers'
Statements. The Hon. Minister

responsible for Community and Government Services, Minister Ehaloak.

**Minister's Statement 681 – 5(2):
Supporting Inuktitut as a Working
Language**

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) Good afternoon. First of all, I want to send my condolences and prayers to my community during this difficult time.

Uqaqtii, as part of *Turaaqtavut*, our government committed to continuing our efforts to increase Inuit employment by supporting Inuktitut as a working language within the government and across the territory.

In 2020 the department, in partnership with the Pirurvik Centre, offered its first online Inuktitut language course for departmental staff. The goal of the course was to support our Inuktitut-speaking employees use their language in the workplace and to help our non-speaking employees become familiar with the foundations of the Inuktitut. As a result of this language training opportunity, 21 employees successfully completed the Pigiavik Level 1 course. The department will continue to explore opportunities to provide language training to its employees based on the success of this initiative.

Community and Government Services is also continuing its work to preserve the Inuit language through technology. In partnership with the Department of Culture and Heritage, the Language Commissioner, and Microsoft, the department has incorporated Inuktitut into the Microsoft Translator tool and is currently working on expanding its

capability by incorporating Inuinnaqtun. The tool allows everyone using the Microsoft 365 suite of applications the ability to access technology supported Inuktitut translation capabilities. The translation tool represents an important step in advancing Inuktitut and promoting the use of the Inuktitut across government and throughout the territory.

Mr. Speaker, Community and Government Services will continue working with our partners to promote the use of Inuktitut in workplace. (interpretation) Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Ministers' Statements. Item 3. Members' Statements. The Hon. Member for Tununig, Mr. Qamaniq.

Item 3: Members' Statements

**Member's Statement 976 – 5(2):
RCMP Body-worn Camera Pilot
Project**

Mr. Qamaniq (interpretation): Thank you, Mr. Speaker. I say "good day" to my constituents in Tununig and my colleagues as well as Nunavummiut.

Mr. Speaker, I rise today to make a statement about the Royal Canadian Mounted Police's body-worn camera pilot project.

Mr. Speaker, as you will recall, I have raised this important issue on a number of occasions during the current Legislative Assembly.

(interpretation ends) Mr. Speaker, I was very pleased to have had the honour of

participating in our Nunavut Senator's roundtable on this initiative, and I thank the other members who served with me.

Mr. Speaker, when I last raised this issue during our spring sitting, I noted that the Royal Canadian Mounted Police had announced that its pilot project was moving to an "evaluation phase." I also emphasized the importance of this project expanding to smaller Nunavut communities, including Pond Inlet.

Mr. Speaker, I will continue to be a strong advocate for measures to strengthen accountability and build trust between the police and the public whom they serve.

At the appropriate time, Mr. Speaker, I will have questions for the appropriate minister. Thank you, Mr. Speaker.

Speaker: Thank you. Members' Statements. The Hon. Member for Baker Lake, Mr. Simailak.

**Member's Statement 977 – 5(2): 2021
Baker Lake Bowhead Hunters**

Mr. Simailak (interpretation): Thank you, Mr. Speaker. (interpretation ends) Good afternoon, my colleagues and my fellow members.

(interpretation) Mr. Speaker, I am sure most Nunavummiut were checking for updates regularly about the Baker Lake bowhead hunt crew. People all over Nunavut saw that. Even though the weather was bad, even though it was windy, raining and in the sunshine, the bowhead hunters were out for five weeks and I am happy and proud that they caught their bowhead whale.

>> *Applause*

Mr. Speaker, I'll mention the names of the bowhead hunters:

- Phillip Putumiraqtuq
- Charlie Tautuaqjuk
- Casey Tularialik
- John Avaala
- Daniel Tagoona
- Hosea Iksiraq
- Patrick Attungala
- Ukku Tanayuk
- Jamie Kataluk
- Umingmak Kabloona
- Elijah Amarook
- Koommak Amarook
- Jonathan Joco Tootoo
- Joe Uqayuittuq
- Darren Itqilik
- Malachi Avaala

Mr. Speaker, many people supported them in any way possible and I thank them immensely, especially the people of Naujaat who spent many hours helping the people of Baker Lake by boating, cooking, and polar bear watches and they shared stories of how they used to hunt their bowhead whales and what to watch out for.

Mr. Speaker, in particular, I'll mention the names of the people of Naujaat who provided assistance ever since Baker Lake people went to Naujaat: Joel Tigumiar, Mark Tigumiar, Paul Tigumiar, Richard Jr. Angotialuk, as well as the conservation officer in Whale Cove and a resident of Rankin Inlet, Joefrey Okalik.

Mr. Speaker, I ask my colleagues to join me in applauding the people of Baker

Lake for harvesting a bowhead whale.
Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Members' Statements. The Hon. Member for Rankin Inlet North-Chesterfield Inlet, Ms. Towtongie.

**Member's Statement 978 – 5(2):
Issues with Tammaativvik
Boarding Home**

Ms. Towtongie (interpretation): Thank you, Mr. Speaker. I rise today to express concerns that have been raised by Kivalliq residents who go to Iqaluit on medical travel and stay at the Tammaativvik Boarding Home.

Mr. Speaker, travel restrictions during the COVID pandemic have led to many more Kivalliq patients travelling to Iqaluit for medical care. The majority of these patients stay at the Tammaativvik Boarding Home.

Mr. Speaker, a number of my constituents have complained that the environment at the boarding home is not at all friendly or comfortable. However, they do not know who to talk to or where to express their concerns and complaints.

Mr. Speaker, the staff at the front desk are not from the north and do not speak Inuktitut. Their approach is often intimidating and my constituents are frightened to ask for help or support.

Mr. Speaker, I understand that the Tammaativvik Boarding Home is run under a contract. When complaints have been raised by my colleagues in this

House, the Minister of Health in the past always stated that he would have to speak with the contractor to resolve issues. It is not clear what steps the contractor has taken.

(interpretation ends) *Uqaqtii*, I would like to finish my statement. Thank you.

Speaker: Thank you. The member is seeking unanimous consent to conclude her statement. Are there any nays? Being none, please continue, Ms. Towtongie.

Ms. Towtongie (interpretation): It is not clear what steps the contractor takes to ensure a safe and welcoming environment that is open and accessible to Inuit and especially those whose preferred language is Inuktitut.

(interpretation ends) Mr. Speaker, I personally find it difficult when my constituents are so reluctant to stay at the boarding home that they ask to stay with me while I am in Iqaluit for Assembly business. It is not possible for me to host them. I wish I could.

I encourage the Minister of Health and his staff to work closely with the contractors operating the Tammaativvik Boarding Home and ensure that services are delivered in a culturally acceptable manner. (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Members' Statements. The Hon. Member for Iqaluit-Manirajak, Mr. Lightstone.

**Member's Statement 979 – 5(2):
Nunavut Land Use Plan**

Mr. Lightstone: Thank you, Mr. Speaker. On July 8 the Nunavut

Planning Commission released a new draft of the Nunavut Land Use Plan. I wish to commend the Nunavut Planning Commission for the tremendous work in creating what will be the largest regional land use plan in the world. Finalizing and implementing the Nunavut Land Use Plan is one of the remaining pieces of unfinished business of the *Nunavut Agreement*.

Since 2007 the Nunavut Planning Commission has been consulting with and listening to every community in Nunavut to create a land use plan for our territory. Having a land use plan in place is crucial for the future of Nunavut. The land use plan is vital for the protection of the environment we depend on.

Caribou, a species the Government of Nunavut manages, is particularly dependent on the land use plan. We know that our herds, whose populations are close to historic lows, need to have their calving grounds, migration routes, and wintering grounds protected to thrive. Without a Nunavut land use plan in place, we have no means to manage the cumulative impacts of industrial activity on our lands.

The Nunavut Land Use Plan is also critical to the economic development of our territory. A plan will provide certainty for the companies willing to invest in Nunavut and a plan can ensure that caribou populations bounce back, while providing clarity on those areas where everyone agrees that a mine or a road could eventually exist.

Along with Nunavut Tunngavik and the Government of Canada, the Government of Nunavut is a signatory to the land use plan. Nunavummiut have been waiting a

long time for this crucial element of the *Nunavut Agreement* to be implemented. I urge our government to work with the other signatories and the commission to finalize the plan before the end of the year.

Mr. Speaker, at the appropriate time I will be asking the minister to provide our Assembly and the public with an update on the matter. Thank you, Mr. Speaker.

Speaker: Thank you. Members' Statements. The Hon. Member for Amittuq, Mr. Kaernerk.

**Member's Statement 980 – 5(2):
Strengthening Inuktitut**

Mr. Kaernerk (interpretation): Thank you, Mr. Speaker. Good day, residents of Amittuq and Nunavummiut.

Mr. Speaker, I rise today to speak about our languages. We know, especially smaller communities, of the importance of language as we use it daily and this is also encouraged by the government, to use our languages in our workplaces and I am proud that the Minister of Community and Government Services supports this initiative to ensure the Inuit language is used more within the government workforce.

Mr. Speaker, my main reason pertains to details listed in the report of the Minister of Languages. I think they are delayed and that's why I rise today and for that reason, we are advised to appreciate our language and not to be shy to use it. How can we further encourage our government? We as Nunavummiut, our language and our culture are still being sloughed off ungratefully, and I would

like to restart the focus on using our language more as it needs to be visible.

For that reason, Mr. Speaker, at the appropriate time I will have questions for the Minister of Languages on the reports she tabled. Thank you, Mr. Speaker.

Speaker: Thank you. Members' Statements. The Hon. Minister responsible for...from Aivilik, Mr. Netser.

**Member's Statement 981 – 5(2):
Nunavut Arctic College Policies**

Mr. Netser (interpretation): Thank you, Mr. Speaker. You're not the first one to refer to me that way.

I say "good day" to my constituents in Coral Harbour and Naujaat. I hope you enjoy your day as fall is coming.

(interpretation ends) Mr. Speaker, I rise today to raise a concern with the policies and practices at Nunavut Arctic College with respect to students being accepted into courses.

Mr. Speaker, I was recently approached by a constituent who had a very negative experience with the college. My constituent was accepted into a program and flew all the way from home, took two days to get here, only to be told on the first day of classes that the person should just go back home. Apparently the formal acceptance letter that the student received was miscommunicated within the college.

Mr. Speaker, as I am sure you can appreciate, coming from a small community yourself, it can be a difficult

and intimidating experience for our students when they leave home and travel to a large regional centre to take up post-secondary education that will, hopefully, improve their opportunities for employment and a career. This is a big step that they're taking.

Mr. Speaker, I find it totally unacceptable that a Nunavut resident who has made the effort to pursue their post-secondary education, who has taken the time to fill out the application forms and provide the necessary documentation, who has received a formal letter of acceptance into their program of choice, who has reorganized their personal life and travelled to the regional centre to continue their education, only to be told by the instructor when they walk into the classroom, "What are you doing here? You are not supposed to be here."

Mr. Speaker, this is an unacceptable way to treat anyone. It is unprofessional and very inconsiderate. It is also very puzzling that one branch of the college doesn't know what the other branch is doing in terms of accepting our students.

Mr. Speaker, at the appropriate time I will be asking the minister questions on the issue. (interpretation) Thank you.

Speaker: Thank you. Members' Statements. The Hon. Member for Netsilik, Mr. Qirngnuq.

**Member's Statement 982 – 5(2):
Impact of Suicide**

Mr. Qirngnuq (interpretation): Thank you, Mr. Speaker. I say "good day" to my fellow residents of Netsilik, my

colleagues, and my fellow residents of Nunavut.

Mr. Speaker, I rise today to speak about suicides and to voice this concern while I am still nominally a Member of the Fifth Assembly. This matter of suicide has impacted many people, and I want to see how this government can address it to lower these rates as well as by us, the leaders.

Mr. Speaker, when I first got elected as an MLA in 2017, I spoke to many elders about the issues and concerns that our people have, and one person, an elderly lady, said to me, “If you can, please mention our youth. We care for their lives. We love our youth and we want them to live a full life. Please ask our government about preventing our youth from committing suicide.”

Mr. Speaker, even though this lady no longer lives, her words still ring in my ears.

I would like to conclude my statements. I would like to be approved. Thank you, Mr. Speaker.

Speaker: Thank you. The member is asking if he could conclude his member’s statement. Are there any nays? Seeing none. Please continue, Mr. Qirngnuq.

Mr. Qirngnuq (interpretation): Thank you, colleagues.

(interpretation ends) Mr. Speaker, we must be more active in preventing our young people from taking their own lives.

Mr. Speaker, suicide touches everyone. It hurts families, friends and relatives.

Mr. Speaker, we know that we do not control anyone’s life. However, there must be solutions to reduce the numbers of suicide that we experience in our territory.

Mr. Speaker, I know that it will take teamwork and effort to get to the point where we can hope that we have begun to reduce suicides in Nunavut. Suicides will not stop unless we continue to fight to reduce its impact in our communities.

Mr. Speaker, Friday was World Suicide Prevention Day and the Embrace Life Council recognized it with a community walk. The work of such groups is very encouraging and I hope that their message is heard by all Nunavummiut.

Mr. Speaker, I asked questions on this issue at the very beginning of my term as an MLA. Now that we are at the very end of our term as Members of Nunavut’s Fifth Legislative Assembly, I will be asking questions on this issue again. (interpretation) Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Members’ Statements. The Hon. Member for Arviat North-Whale Cove, Mr. Main.

**Member’s Statement 983 – 5(2):
Providing Employment
Opportunities for Nunavummiut**

Mr. Main (interpretation): Thank you, Mr. Speaker. Good day to my colleagues and to my constituents.

Mr. Speaker, I have brought this issue up repeatedly in the House and it's in regard to unemployment. We all know that unemployment percentages are very large and there are probably thousands of people looking for jobs in their communities and it's something that's very hard to see, but we do have to talk about it and I do have good news. There are many job opportunities out there within construction and the mining sector.

(interpretation ends) Mr. Speaker, there are literally hundreds of jobs and careers available to Nunavummiut in the trades. Mr. Speaker, a career in the trades begins with an apprenticeship. I would like to take this opportunity to recognize two local businesses in Arviat who have a solid track record in employing apprentices, getting them through their apprenticeship, and employing these local Inuit tradespersons. Those are Eskimo Point Lumber Supply and Arctic Traders, so I would like to recognize those two businesses. They do a great job.

Mr. Speaker, it is not only up to the private sector to provide apprenticeship opportunities. I believe that the Government of Nunavut's departments and agencies should also be providing apprenticeship positions so that our young people can move up and become journeypersons.

An Hon. Member: Hear, hear!

Mr. Main: Mr. Speaker, in the last sitting, I asked two written questions on this subject, one to the Qulliq Energy Corporation and the other to Community and Government Services, and I was somewhat disappointed by the reply. The

response indicated that the department I asked the question to does not track the number of apprentices and the Qulliq Energy Corporation does track the number of apprentices, which is currently zero, Mr. Speaker.

An Hon. Member: What a shame!

Mr. Main: I do feel that there is room for improvement on this file and it is one that's very important to increasing employment for our youth across Nunavut and the future of Nunavut.

At the appropriate time I will have questions on this subject. (interpretation) Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Members' Statements. The Hon. Member for Kugluktuk, Mr. Pedersen.

Member's Statement 984 – 5(2): A Successful Beluga Hunt in Kugluktuk

Mr. Pedersen: Thank you, Mr. Speaker. Good afternoon, colleagues.

Before I do my statement, I would like to say something about multitasking and the dangers of it. Don't cut your hair and multitask or you will end up like this.

>> *Laughter*

Thankfully it grows back.

Mr. Speaker, I rise today to pay tribute to Kugluktuk's hunters and trappers and harvesters as well.

Mr. Speaker, despite the hardships and tragedies that Kugluktuk has faced over the past year, I am very pleased to have this opportunity to share with the House the wonderful experience the community recently had this summer.

Mr. Speaker, as you may know, Kugluktuk's beluga harvest is a cyclical event. I believe that it has been about a decade since we last harvested the whales.

Mr. Speaker, in late August of this year, several dozen hunters successfully harvested around 25 beluga whales. I was very fortunate to have had the opportunity to join the hunt, and I pay tribute to the leaders of Kugluktuk's hunters and trappers organization, especially Chairman Larry Adjun.

Mr. Speaker, occasions like this truly bring people and communities together. As is our tradition, the harvest was shared with elders and residents. Our values of generosity and sharing were on full display, and I join with my constituents in celebrating the spirit of togetherness.

Mr. Speaker, as you may have noted, there was extensive news coverage of the event, and I am proud that the experience of J.J. Ihumatak, a young resident, received a lot of attention.

J.J. is a young man who had the experience of his first hunt, and I am proud of the guidance that he received from his elders. He caught his first whales, yes, whales, he caught two, and I know that the whole community is very proud of him.

Mr. Speaker, I ask all members to join me in paying tribute to the hunters and harvesters of Kugluktuk. Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Members' Statements. The Hon. Member for Iqaluit-Tasiluk, Mr. Hickes.

Member's Statement 985 – 5(2): A Successful Baseball Season in Iqaluit

Hon. George Hickes: Thank you, Mr. Speaker. I rise today to congratulate the Iqaluit Slo-Pitch League on another successful season.

Mr. Speaker, working closely within guidelines established by the Chief Public Health Office, there were more than 350 people registered in the co-ed league, which made for a great summer of ball for Iqalummiut.

This weekend was the league championships, where the NuBrew Co. Brewers took home the A division title in a thrilling come-from-behind win over the Ballas this weekend.

Mr. Speaker, Shane Power lived up to his name and powered home the game-winning hit, while Shawna Kyak scored the winning run for the Brewers, who finally captured the league title after finishing second place the last two seasons.

Mr. Speaker and members, I would like to take this moment to congratulate again to the league on another successful season and congrats to the NuBrew Co.

Brewers on their league championship.
Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Members' Statements. The Hon. Member for Cambridge Bay, Ms. Ehaloak.

**Member's Statement 986 – 5(2):
Welcome to New Inuinnaqtun
Interpreter**

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) First of all, I would like to apologize for not introducing a friend of mine who is new to this House, doing Inuinnaqtun translations, and please help me in welcoming Ms. Eva Omilgoitok, who is our new interpreter/translator...

>> *Applause*

...from Cambridge Bay. (interpretation)
Thank you, Mr. Speaker.

Speaker: Thank you and welcome. Members' Statements. The Hon. Member for Quttiktuq, Mr. Akeeagok.

**Member's Statement 987 – 5(2):
Marine Infrastructure in the High
Arctic**

Hon. David Akeeagok (interpretation): Thank you, Mr. Speaker. In August 2019 the parties of the Qikiqtani Inuit Association, the federal government, and the Government of Nunavut arrived at an agreement to build future marine facilities in both Resolute Bay and Grise Fiord. Through this agreement signed by the parties, it was to commence upon completion of the tripartite agreement and it was completed this year, so we

can anticipate the future development of these projects.

I am completely already antsy about their development as communities can face dangerous conditions without proper facilities. I am very pleased that we will initiate the building of these marine facilities and wish to thank the Qikiqtani Inuit Association, the federal government, and the territorial government for working together in setting up these large projects. Thank you, Mr. Speaker.

Speaker: Thank you. Members' Statements. I have no more names on my list. We will move on in the orders of the day. Item 4: Returns to Oral Questions. Item 5: Recognition of Visitors in the Gallery. Being none. Item 6: Oral Questions. The Hon. Member for Tununiq, Mr. Qamaniq.

Item 6: Oral Questions

Question 1422 – 5(2): RCMP Body-worn Camera Project

Mr. Qamaniq (interpretation): Thank you, Mr. Speaker. I'll ask my questions in English for clarity.

(interpretation ends) Mr. Speaker, my questions are for the Minister of Justice, and they concern the Royal Canadian Mounted Police body-worn camera pilot project in Iqaluit.

When I last raised the issue during our spring sitting, I noted that the Royal Canadian Mounted Police had announced that its pilot project was moving to an "evaluation phase." At that time the minister indicated to me that he

did not have a timeline for the completion of this process.

Mr. Speaker, it is now September 2021. Can the minister update the House on the status of the evaluation of the body-worn camera pilot project, and will he commit to ensuring that a copy of the evaluation report is provided to all Members of the Legislative Assembly through his office? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for the Department of Justice, Minister Hickes.

Hon. George Hickes: Thank you, Mr. Speaker. I'll try to answer the member's questions in my response.

Mr. Speaker, we have been very clear with Public Service Canada that we're in full support of a rollout of body-worn cameras, not only across Nunavut but across the country. Just to give the member an update, from what I understand, the evaluation is either complete or nearly complete, with an anticipated RFP coming out hopefully later this month, but I'm anticipating within the next few weeks that the RFP will come out for procurement for body-worn cameras for the RCMP across the country. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Speaker. I thank the member for his answer. Mr. Speaker, in June of this year the Royal Canadian Mounted Police announced that it is:

“...currently in the process to continue to issue body-worn cameras in a phased manner across Canada beginning in 2022. The initial test zones will be located in a mix of remote, rural and urban communities. Iqaluit is targeted as one of the first locations in Nunavut to receive the newly acquired tool and technology once the national program is established.”

When I last raised this issue with the minister, I emphasized the importance of this project being expanded to smaller communities, including Pond Inlet. Can the minister clarify how the territorial Department of Justice is working with the Royal Canadian Mounted Police to determine which Nunavut communities will benefit from the use of body-worn cameras? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Hickes.

Hon. George Hickes: Thank you, Mr. Speaker. The Department of Justice as well as my own office have been in constant communication with Public Service Canada to make sure that Nunavut is a part of the earliest rollout of body-worn cameras in the country. The intention is that all Nunavut communities will be able to participate in body-worn camera initiatives going forward. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Speaker. I thank the minister. As the minister will recall, information provided to Members of the Legislative Assembly in June of this year indicated that the Royal Canadian Mounted Police planned to select a vendor this summer to provide

body-worn cameras and a supporting digital evidence management system. Can the minister confirm which vendor received the contract and how much has been budgeted for the project? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Hickeys.

Hon. George Hickeys: Thank you, Mr. Speaker. As that's a federal budget amount, I don't have access to that detailed information. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Baker Lake, Mr. Simailak.

Question 1423 – 5(2): Drinking Water

Mr. Simailak: Thank you, Mr. Speaker. My questions today are for the Minister of Community and Government Services.

As the minister will recall, I have spoken on a number of occasions about the importance of ensuring that all of our communities have access to safe and clean drinking water.

As the minister is aware, the community of Baker Lake has experienced a significant number of boil water advisories in recent years and my constituents are very frustrated. There were at least two boil water advisories this summer.

When I raised this issue with the minister during our recent spring sitting, I noted that her department's current business plan indicates that one of its priorities has been to "Complete the Government of Nunavut's Water

Strategy and the Drinking Water Strategic Framework and Action Plan." At that time she indicated her willingness to share these important plans with the Members of the Legislative Assembly.

Will the minister commit to tabling these items in the House before the current Legislative Assembly dissolves? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for Community and Government Services, Minister Ehaloak.

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) I thank the member for his question. I know that water in our communities is so important and for the health for our residents.

Community and Government Services, in collaboration with the Department of Environment and the Department of Health, have been working strategically on developing a drinking water strategy. As the member is aware, the department did contact the Nunavut Water Board, who is developing a Nunavut water management strategy. As of August 19, the department received a letter from the Nunavut Water Board. We indicated that we wanted to work towards the strategy and they were in agreement that we should start working on this.

Just so the member is aware, the Nunavut Water Board is working on a water management strategy and what Community and Government Services wants in our water management strategy is to focus more on treatment methods and identifying training requirements for the drinking water produced and

delivered in our communities. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Simailak.

Mr. Simailak: Thank you, Mr. Speaker. I thank the minister for her response. I'm glad things are moving forward.

As the minister will recall, the government recently announced that "new standards for surveillance of Nunavut's drinking water systems have shown high turbidity in many of the territory's drinking water systems."

When I last raised the issue of drinking water quality during our recent spring sitting, the minister assured me that her department "will be seeking funds to ensure that Baker Lake's water treatment plant is up to higher standards."

Can the minister provide an update today on what funding has been allocated to upgrade Baker Lake's current water treatment infrastructure? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Ehaloak.

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) Again I thank the member for his question. Community and Government Services did request funding from the Financial Management Board to ensure that the water treatment in Baker Lake was our first priority to make sure that the water that they're receiving is up to health standards. I'm happy to say that the department did reprofile \$150,000 to ensure that this work can be done. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Simailak.

Mr. Simailak: Thank you, Mr. Speaker. Thank you, minister, for your response. I'm very happy that funds have been re-profiled to help Baker Lake.

Mr. Speaker, when I last raised the issue of drinking water quality during our recent spring sitting, the minister also assured me that her department has been "talking with the Municipality of Baker Lake on alternative sources to get water." Can the minister provide an update today on what specific actions have been taken to accomplish this objective? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Ehaloak.

Hon. Jeannie Ehaloak: Thank you, Mr. Speaker. Community and Government Services is working on, as the member has stated, alternatives and we will continue to work with the municipality to ensure that their drinking water, where the water is coming from will be resolved, hopefully, before snow falls. I would like to assure the member that we will continue to work diligently and keep in communication with the municipality so that this can be resolved. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Amittuq, Mr. Kaernerck.

Question 1424 – 5(2): Minister of Languages Annual Reports

Mr. Kaernerck (interpretation): Thank you, Mr. Speaker. As I stated, my question is for the Minister of Languages.

Mr. Speaker, on September 9 the Minister of Languages tabled three annual reports, starting from 2015 to 2018.

Mr. Speaker, the question I wanted to raise relates to languages, as the most recent report from 2017-18 identifies that a fund of \$5 million is available for disbursement through the Department of Culture and Languages using the Inuit Language Implementation Fund for government departments and agencies to promote the use of the Inuit language as the working language of the government.

Can the minister provide an overview of this \$5 million for languages that is expended each year? Has this money created any jobs in the Amittuq region such as Igloolik or Sanirajak? Are the funds used to just educate and train people? How is that \$5 million being used, just for training, through positions, or how is the funding supposed to be used for languages? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister of Languages, Minister Nakashuk.

Hon. Margaret Nakashuk (interpretation): Thank you, Mr. Speaker. I also thank the member for that question. The annual funding is made available to be requested by the communities and the hamlets are able to request for young people and elders. Non-profit organizations are also eligible to ask for money from those funds. It's supposed to be for all the communities in Nunavut. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Kaerner.

Mr. Kaerner (interpretation): Thank you, Mr. Speaker. As I stated earlier, our language needs to be more prominent within the government and as I stated earlier, this is supported by the Department of Community and Government Services.

Mr. Speaker, I would like to ask this question now. Now, with our language, the government's Uqausivut 2.0 five-year strategic plan was tabled in 2018. Can the minister provide an update on how effective this strategic plan has been to date? For example, you stated that some of the money can be requested for programs and the Department of Culture and Heritage can also ask for money from that as well.

The question I would like to ask is: what sort of planning do you do for the language? Do you visit the communities and consult with the residents and elders? Minister, perhaps you can explain to the House what you actually do when you're planning for the language. Thank you, Mr. Speaker.

Speaker: Thank you. Minister Nakashuk.

Hon. Margaret Nakashuk (interpretation): Thank you, Mr. Speaker. I also thank you for that good question. The proposal for money is only a part of it; some of the money is given to the Department of Education for Inuktitut language programming to support their efforts and also to the communities. There are different pots of money made available to the communities and what you mentioned, Uqausivut 2.0, that board also receives money from that and they try to see how

the program can be spread around the communities.

When we get requests from different communities, they outline how much money has been requested by that community before and once we see that a particular community has not been asking for many funds, we ask them why that is the case. However, recently we have not really been visiting the communities, but normally they let the hamlets know that there is money available that they can ask for. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Kaernerk.

Mr. Kaernerk (interpretation): Thank you, Mr. Speaker. I also thank the minister for that clear explanation regarding Uqausivut 2.0. Mr. Speaker, this is really important. If a job can be created in Sanirajak, I think the government's planning would become visible if that happens.

I would like to ask if the minister can provide an explanation or answer. It started in 2015 and there have been three annual reports that were finally tabled to the House on September 9 of this year. Why has it taken so long to produce the annual reports? Is it because you didn't have enough money to do it? What was the reason for the delay in the annual reports? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Nakashuk.

Hon. Margaret Nakashuk (interpretation): Thank you, Mr. Speaker. I also thank you for the very good question. It's unfortunate we were

late due to lack of staff and the 2019 annual report is currently being worked on and it is also delayed, but the problem we have faced recently had been lack of staff and we work with different organizations. We also wait for reports to be submitted by non-profit organizations. Those are some of the factors of delaying annual reports. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Rankin Inlet North-Chesterfield Inlet, Ms. Towtongie.

Question 1425 – 5(2): Additional Teachers Needed at Chesterfield Inlet School

Ms. Towtongie (interpretation): Thank you, Mr. Speaker. (interpretation ends) I would like to direct my question to the Minister of Education.

(interpretation) Mr. Speaker, on September 9 I tabled a letter in this House from the Chesterfield Inlet District Education Authority which makes a well-supported request for two certified teaching positions, an English teacher and an academic learning coach.

Can the minister confirm whether he has read this letter and tell this House on how he plans to respond to the request? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for Education, Minister Joanasie.

Hon. David Joanasie (interpretation): Thank you, Mr. Speaker. I thank my colleague for the question. Mr. Speaker, the letter coming from the Chesterfield Inlet DEA was written in August and we

received it in our office by email on September 7 and I signed a response letter today.

Mr. Speaker, each year the schools receive positions based on student enrolment numbers. This includes what we will be trying to implement over the upcoming three years of operations and we will keep trying to increase our teacher numbers, and this is included in that response. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Ms. Towtongie.

Ms. Towtongie (interpretation): Thank you, Mr. Speaker. (interpretation ends) As you will recall, amendments to Nunavut's *Education Act* were approved by this Assembly in 2020.

The DEA for Chesterfield Inlet has been working on these two positions for 15 years.

During the review of the bill to amend the *Education Act*, members were given to understand that a new funding formula to determine the number of teaching positions allocated to Nunavut schools was being developed.

Can the minister provide an overview of the new funding formula, including how the number of teaching staff allocated to each school is decided and how the required academic level of each teaching position is determined? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Joanasié.

Hon. David Joanasié (interpretation): Thank you, Mr. Speaker. The school positions are allocated. This plan will be

over three years and we began in 2021-22 in that student support assistants will see an increase and we have increased funding for the start of the school year in all of Nunavut. For the 2022-23 year, any other positions like janitors and student support assistants will be included and will see an increase. The schools will be seeing more teaching positions being allocated, but first, we focus on the student-educator ratio and we also look at the student attendance, and we will now start focusing more on headcounts. It will be fully implemented in the 2023-24 year. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Ms. Towtongie.

Ms. Towtongie (interpretation): Thank you, Mr. Speaker. While I recognize that the Department of Education has a formula for determining the basic number of school staff needed in each community, I believe we must also take into consideration the actual academic needs for education staff to deliver courses and programming that will give our students, our children, the best options for advancing their education and their future.

It is the start of the school year. Will the minister commit to reviewing Chesterfield Inlet's request for certified teachers in English and academic studies and approving these two extra positions before the end of his term? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Joanasié.

Hon. David Joanasié (interpretation): Thank you, Mr. Speaker. The DEAs in our communities also work with our

staff. For example, in Chesterfield Inlet at the moment, in the 2021-22 fiscal year, 15.5 positions are allocated and that is the level of staff in the school, and the DEAs decide what to do with those positions or to be allocated with what academic background the teacher has. It may be for teacher assistants. As it is, the request from Chesterfield Inlet cannot be entertained at the moment. However, this will no doubt see more teachers in the community in two to three years, as we have all anticipated. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Arviat North-Whale Cove, Mr. Main.

Question 1426 – 5(2): Apprenticeship Programs in QEC

Mr. Main (interpretation): Thank you, Mr. Speaker. I have a question for the Minister responsible for the Qulliq Energy Corporation.

(interpretation ends) Mr. Speaker, as I mentioned in my statement, I am proud of private sector...I would characterize them as good corporate citizens that do their part in training future journeypersons in Nunavut, and I feel that Nunavut government departments and agencies and corporations such as the Qulliq Energy Corporation should also be doing their part to train future journeypersons and taking on apprentices.

Mr. Speaker, the written question I submitted earlier this year to the Qulliq Energy Corporation covered three years and it showed that in 2018-19, 2019-2020, and 2020-21 that the Qulliq Energy Corporation employed between

31 and 32 journeypersons in the positions such as heavy equipment technician, power system electrician, power line technician, and a few others.

Unfortunately, based on this response from the Qulliq Energy Corporation, it shows that in those three years there were zero apprentices under those approximately 30 journeypersons and so that's my first question for the minister. Why does the Qulliq Energy Corporation not have any designated apprentice positions to work and train underneath your approximately 30 journeypersons? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for the Qulliq Energy Corporation, Minister Ehaloak.

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) I thank the member for his question. The Qulliq Energy Corporation's apprenticeship program has been put on hold due to lack of capacity in the Qulliq Energy Corporation's human resource department, as in the last few years, and the Qulliq Energy Corporation last had an apprentice in the 2017-18 fiscal year. This employee is now a full-time employee of the Qulliq Energy Corporation. With our human resource department now functioning and with our new president in place, the board and the staff are looking into creating more apprenticeship programs within the Qulliq Energy Corporation. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Speaker. Thank you, minister. (interpretation ends) It's good to hear that there are discussions around this issue. However, it is troubling that this program was put on hold in the first place, Mr. Speaker. It seems quite important in terms of increasing Inuit employment and increasing Nunavummiut employment within the Qulliq Energy Corporation.

Can the minister further elaborate in terms of what led to the apprenticeship program she just described being put on hold? Was it a lack of money? What caused this program to be put on hold for what appears to be a number of years? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Minister Ehaloak.

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) I thank the member for his question. The lack of apprenticeship programs within the Qulliq Energy Corporation for the last few years, as I had stated, is our human resource department. Our human resource department had lack of staff. We were short-staffed within our human resource department.

The Qulliq Energy Corporation was focused more on assisting the staff within the organization, but working towards filling all our positions within the human resource department, we will, as I stated earlier, create and work on trying to hire apprentices. I am very proud to say that the Qulliq Energy Corporation, at this time, our Inuit employment rate right now is at 56 percent. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Speaker. (interpretation ends) Thank you, minister. Fifty-six percent is a number and I believe it could be a higher number with things such as apprenticeship programs that are not put on hold and that continue year after year.

My last question for the minister is: when can youth and members of the public who are interested in careers in the trades...when can these Nunavummiut expect to hear announcements regarding apprenticeship openings within the Qulliq Energy Corporation? What is the timeline for bringing this program back online? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Minister Ehaloak.

Hon. Jeannie Ehaloak (interpretation): Thank you, Mr. Speaker. (interpretation ends) I thank the member for his question. I can assure the member that once we have our plans to create our apprenticeship programs, announcements will be made to the public to inform them of the types of apprenticeship positions that will become available within the Qulliq Energy Corporation.

I agree with the member that our Inuit employment rates within the Qulliq Energy Corporation should be higher and more Inuit should be employed within our communities, and I thank the member for his question. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions.
The Hon. Member for Iqaluit-Manirajak,
Mr. Lightstone.

**Question 1427 – 5(2): Nunavut Land
Use Plan/Nunavut Planning
Commission**

Mr. Lightstone: Thank you, Mr.
Speaker. My questions today are for the
Premier.

As I had indicated in my member's
statement, the Nunavut Planning
Commission recently released a new
draft of the Nunavut Land Use Plan. The
Government of Nunavut is a signatory of
the Nunavut Land Use Plan, along with
Nunavut Tunngavik and the Government
of Canada.

I would like to ask the Premier if he
would be able to provide the Assembly
with an update on this matter, including
the process that's necessary to finalize
the draft land use plan. Thank you, Mr.
Speaker.

Speaker: Thank you. The Hon. Premier
of Nunavut, Mr. Savikataaq.

Hon. Joe Savikataaq (interpretation):
Thank you, Mr. Speaker. (interpretation
ends) I'm glad the member is giving me
the opportunity to update Nunavummiut
on the land use plan that is being in the
works by the Nunavut Planning
Commission.

Mr. Speaker, the most current draft plan
is out and the plan for the Nunavut
Planning Commission is to do a
consultation process in the Kivalliq and
in the Kitikmeot, and they have an
application process for funding to the
federal government also to do the Baffin

in 2022. Once all the consultations are
done, then the Nunavut Land Use Plan
may be revised or may stay the same.
That depends on the consultation.

Mr. Speaker, just so that Nunavummiut
will know, the Nunavut Planning
Commission is an independent body. As
the Nunavut government, we cannot try
to influence them. The timeline as to
when the Nunavut Land Use Plan will be
done is the Nunavut Planning
Commission's timeline. This is their
project and when they deem their project
is done, they will present the Nunavut
Land Use Plan to the Government of
Nunavut, to the federal government, and
to Nunavut Tunngavik Incorporated.
Thank you, Mr. Speaker.

Speaker: Thank you. Your first
supplementary, Mr. Lightstone.

Mr. Lightstone: Thank you, Mr.
Speaker. I would like to thank the
Premier for providing that information.
One aspect of the Nunavut Land Use
Plan is, of course, the protection of the
environment as well as wildlife in a
manner that enables sustainable
economic development, and one
particular aspect of the Nunavut Land
Use Plan is the protection of caribou.

Mr. Speaker, I would like to state that I
enjoy my tuktu as much as the next Inuk,
but looking at the significant decline in
our caribou herds over the last number
of decades, I'm quite concerned that the
current caribou protection is insufficient.

Mr. Speaker, there are two opposing
methods to wildlife protection. There is
one which is a blanket protection of
calving grounds, migration routes, and

wintering grounds, and another method is mobile protection of critical habitat.

My next question for the Premier is: what is the Government of Nunavut's position on which method is better suited for ensuring the rebound of our caribou herds? Thank you, Mr. Speaker.

Speaker: Thank you. Premier Savikataaq.

Hon. Joe Savikataaq: Thank you, Mr. Speaker. Just about all caribou herds in Canada are on the decline, the barren-ground caribou herd. It's not a Nunavut-specific problem that we are facing right now, Mr. Speaker. Just so the member will know that most caribou herds in Canada are on the decline and there is a cycle. We know that caribou populations do cycle in Nunavut and most are on the down cycle.

Mr. Speaker, in terms of caribou protection, the Department of Environment looks at each individual caribou herd individually and manages each herd separately. For example, in Baffin the caribou herd made a drastic decline and there was a moratorium, and there was a total allowable harvest put and the total allowable harvest is at 250 caribou in Baffin right now.

Mr. Speaker, we can't make a blanket caribou management plan for all of Nunavut. We will manage each caribou population on its own individual merit, but rest assured, the polar bear population is a critical concern for the Department of Environment. We know that Nunavummiut are used to eating their caribou and using the fur and they use it all, and we want to make sure that

future generations will still have caribou meat and the fur to enjoy.

Mr. Speaker, we will do whatever it takes to protect the caribou population. When they are in a critical situation, we will deal with it. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Lightstone.

Mr. Lightstone: Thank you, Mr. Speaker. Knowing that minerals will remain in the ground forever and caribou herds have experienced substantial declines, I would like to ask: will the Government of Nunavut go back to its original position of protecting critical caribou habitat rather than relying on mobile protection zones that are untested and do not provide certainty here in Nunavut? Thank you, Mr. Speaker.

Speaker: Thank you. Premier Savikataaq.

Hon. Joe Savikataaq: Mr. Speaker, we do have calving ground protection areas that come into effect when the caribou are calving. Mr. Speaker, like I told the member, we will be relying on managing each caribou herd on its merit and the demand by the harvesters on that herd.

For the land use plan, as there will be total protection, mixed use, or individual places, the Nunavut Planning Commission is working on the land use plan and once the land use plan is approved and signed off by the federal government, our government, and Nunavut Tunngavik Incorporated, that will be the plan and we will abide by the plan, but until the finalized plan is presented to us, we're waiting on the

Nunavut Planning Commission to present the plan. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Aivilik, Mr. Netser.

Question 1428 – 5(2): Nunavut Arctic College Policies

Mr. Netser (interpretation): Thank you, Mr. Speaker. As I stated in my member's statement, my constituent was sent here for a course at the beginning of this month. Firstly, on his first day of college, his instructor asked what he was doing there because he was not supposed to be here. I would find that embarrassing. When he first applied for college courses here, he was approved by Arctic College. Afterward, instructors told him in this process that he should not even be here at the college.

I would like the minister to elaborate as the Minister responsible for Arctic College on the procedures they have for people who apply for courses in the college. If approved centrally from here where they go to another part of the college, they're told not to be there. Do these different divisions within the college not work together? We would like further clarification on what procedures they have for people applying for college courses. Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for Nunavut Arctic College, Minister Joanasie.

Hon. David Joanasie (interpretation): Thank you, Mr. Speaker. I thank my colleague for that question. I also share

my colleague's concern on this issue. Mr. Speaker, people apply for different courses in the college and the applications are available annually. There are different criteria in some cases for those just starting their courses and for those who are continuing their courses year after year. They go back for the second, third or fourth year in courses as different courses have different year requirements. Nonetheless, we ensure the applications are filled properly and that's how they go through with it before the start of their courses. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Speaker. It seems to be a lack of communication between different divisions with Arctic College and college administration. That is unfortunate to see, as we need to correct that type of systemic problem which could be easily fixed.

(interpretation ends) Mr. Speaker, as those of us from Nunavut's smaller communities are well aware, it can be a difficult and challenging experience to leave home and go to the larger regional centres to pursue their dreams.

Can the minister clearly explain why the college does not provide better support in terms of what I just pointed out, for Nunavummiut to access and attend post-secondary education? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Minister Joanasie.

Hon. David Joanasie (interpretation): Thank you, Mr. Speaker. What my

colleague is saying, he singled out one person's experience from his constituency. As he was saying, I cannot talk about them separately as there can be confidentiality issues. Nonetheless, I can say that we encourage all students to complete their courses, even if there are any challenges or if they are running into seemingly insurmountable problems, then they get advise on completing their courses.

Mr. Speaker, if there was an error in the carrying out of those procedures, I would like to be notified. I also thank my colleague for bringing this up and perhaps he can talk to me more about it outside of this sitting. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Speaker. Indeed, but if we don't publicly speak about a problem in this House, then usually nothing is done to rectify the problem and we see that transpire time and again.

Can the minister announce procedures in this House so that people who experience this type of barrier don't repeat it? Maybe through the senior staff and the board of directors, as he probably meets with them, they must meet occasionally with the minister. Can he request the directors or administrators so that no other student experiences this and to fix it now so that our descendants who want to go to college won't be going through that again? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Joanasia.

Hon. David Joanasia (interpretation): Thank you, Mr. Speaker. Perhaps I can inform all my colleagues to be aware that while in session, they can express their concerns outside of the session or at any time. If we see anything in the future outside of the session, we would want to be informed right away. We only meet here occasionally after so many months. We feel for students who experienced that and we will keep that in mind.

Mr. Speaker, when I meet with the Nunavut Arctic College Board of Directors in the future, I think they meet monthly, but our officials know these details so that they can be clearer that we all don't want to see that repeated for any students wanting to continue their education. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Netsilik, Mr. Qirngnuq.

Question 1429 – 5(2): Impact of Suicide

Mr. Qirngnuq (interpretation): Thank you, Mr. Speaker. (interpretation ends) I would like to direct my question to the Minister of Health, who is also the Minister responsible for Suicide Prevention.

Mr. Speaker, the elder who urged me to raise the issue of suicide in this House is no longer with us, but her words ring loud in my ears.

Can the minister provide an overview of what specific initiatives or activities are currently being provided to prevent the loss of young lives to suicide in

Nunavut? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for Suicide Prevention, Minister Kusugak.

Hon. Lorne Kusugak (interpretation): Thank you, Mr. Speaker. The Department of Health is responsible for suicide prevention programs and services, and independent organizations to talk about suicide prevention and we usually get quite a lot of requests for funds to provide suicide prevention programs and services within the community. It's usually organizations that are non-profit that can access those funds in the communities. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Qirngnuq.

Mr. Qirngnuq (interpretation): Thank you, Mr. Speaker. I also thank the minister for that clarification. (interpretation ends) Mr. Speaker, during the Fourth Assembly, the government tabled the 2017-2022 *Inuusivut Anninaqtut Action Plan*. This document includes many very good initiatives to help support those who may be thinking of suicide, to help prevent suicide, and to encourage family members and community leaders to address the issue.

Can the minister tell us how the Inuusivut Anninaqtut Action Plan is currently being implemented and whether it has been effective in preventing suicides across Nunavut? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Minister Kusugak.

Hon. Lorne Kusugak (interpretation): Thank you, Mr. Speaker. The Inuusivut Anninaqtut Action Plan was tabled in the House and it was for 2017-2022. We are currently looking at how the program went and we will be doing a review up to 2021. Of the recommendations that were made in the action plan, 25 percent of them have been implemented and 56 percent is currently implemented. Moving forward, we are continually looking at the other recommendations that were given so that they can be implemented and utilized in the communities. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Qirngnuq.

Mr. Qirngnuq (interpretation): Thank you, Mr. Speaker. I would like to thank the minister because that will not only help just the youth but also the communities as a whole. There are 25 communities in Nunavut, and within the communities there have been many suicides that have occurred in each one.

(interpretation ends) Mr. Speaker, the suicides that are happening all across Nunavut will not stop unless we continue to fight to stop it, in our communities, in our regions and across the territory. I would like to thank the Embrace Life Council for their work in this area.

Will the minister commit to pushing this issue forward so that it is at the top of the priority list for our next government when the Sixth Assembly comes together in this House? (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. Minister Kusugak.

Hon. Lorne Kusugak (interpretation): Thank you, Mr. Speaker. When we say that one suicide is one too many, we mean it. That is still what we are saying today. Suicide hurts the whole community and it also hurts all the people of Nunavut. Even if the person who commits suicide isn't known personally by everyone, it still had an impact on the total population of Nunavut.

It is a top priority of our department to address the recommendations in the Inuusivut Anninaqtuq Action Plan. To that end, we are closely following the priorities set out in the Inuusivut Anninaqtuq Action Plan to monitor our progress. We also urge the volunteers, the youth councils, and everybody else to apply for funds that are made available if they want to hold workshops on the importance of embracing life.

Mr. Speaker, before I sit back down, let me say that the Department of Health's website also has documents related to the Inuusivut Anninaqtuq Action Plan, what the objectives are, and where we are at in achieving those objectives. It's available on the website. For those who don't have access to the website, we can make paper copies available upon request.

Mr. Speaker, before the end of our term, we will make sure that suicide prevention continues to be a top priority for the next government. Thank you, Mr. Speaker.

>> *Applause*

Speaker: Thank you. Oral Questions. The Hon. Member for Uqqummiut, Mr. Keyootak.

Question 1430 – 5(2): Fur Exchange Program

Mr. Keyootak (interpretation): Thank you, Mr. Speaker. I say “good day” to the people of Clyde River and Qikiqtarjuaq who are watching the proceedings and my colleagues.

Mr. Speaker, I would like to direct my questions to the Minister of Environment.

Mr. Speaker, I wasn't able to participate in part of the spring sitting and I do apologize, but I've brought this question up on more than one occasion. This spring we heard about hunters that were sending out their furs to various auctioneers and that some of them were waiting quite a long time to receive their payments. I am sure some of the furs are still good.

Can the minister tell us if the furs that were sent out but not paid for will be returned to their owner or to Nunavut? Can the minister give us an update on what is happening with this issue? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister of Environment, Minister Savikataaq.

Hon. Joe Savikataaq (interpretation): Thank you, Mr. Speaker. I believe the member is referring to polar bear hides. There were more than 300 hides at the auctioneers in southern destinations. I indicated at that time that the polar bear hides were not being bought. To date, 345 polar bear hides were returned to Nunavut and are now in Iqaluit.

Some of the harvesters have received their money. Usually how we do it is the

hunter brings in the hide, they get paid a portion of the price of the hide, and then the hide is sent out to the auctioneer. The hunters are then given the remaining balance upon the ultimate sale of the hide. If the hide is not purchased, then it is at the discretion of the Department of Environment as to how they will dispose of the hide and further compensate the hunters.

The hides in question are now in Iqaluit. Some of the harvesters opted to have their hides returned and about 80 to 100 hides were donated to sewing organizations. The remainder of the hides will be sold online. There are approximately 50 to 60 hides still in possession of auctioneers in the south. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Keyootak.

Mr. Keyootak (interpretation): Thank you, Mr. Speaker. I also thank the minister for that clarification. Mr. Speaker, usually the harvesters are not in the wage economy because we can't hire everybody. However, it is important that full-time hunters should be given more support by this government. Can the minister clarify if the individuals who do not want their hides returned will end up owing money? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Savikataaq.

Hon. Joe Savikataaq (interpretation): Thank you, Mr. Speaker. If the individuals who were paid for their hides do not want their hides back, they don't end up owing money. The hide is at the discretion of the Department of

Environment on how they want to dispose of it.

Initially the polar bear hides were selling for a very good price and the harvesters were given 50 percent of the price. At that time one hide was worth \$3,000, but the price has gone down quite a bit as of today. If they do not want the hides returned to them, then the hide will become an asset of the Department of Environment.

For the information of Nunavummiut, some of the harvesters are no longer with us, so therefore no money will be asked of these individuals and the hides will be returned to their families. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Keyootak.

Mr. Keyootak (interpretation): Thank you, Mr. Speaker. I also thank the minister for explaining that very clearly. Mr. Speaker, it is not only polar bear hides have been sent out; the hides of other furred animals have also been sent out to auction. Is this current work only being done for the polar bear hides right now? Does it exclude the other hides? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Savikataaq.

Hon. Joe Savikataaq (interpretation): Thank you, Mr. Speaker. It is only the polar bear hides that are currently being worked on. Sealskins fall under the Department of Environment. The sealskins are purchased by the Department of Environment with a full, one-time payment, so this issue does not affect them.

However, when it comes to the hides of foxes, wolves, and wolverines, harvesters get paid only for part of the price of the hide and once it is sold at the auction, they receive the rest of the money. There is a good demand for foxes, wolves, and wolverines, but there is a low demand for polar bear hides. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Gjoa Haven, Mr. Akoak.

Question 1431 – 5(2): Airport Infrastructure

Mr. Akoak: Thank you, Mr. Speaker. (interpretation) Thank you. First of all, if I can say this, I send my condolences to the people of Cambridge Bay, Taloyoak, Tuktoyaktuk, and my wife, who has lost a loved one. I love you and I hug you.

(interpretation ends) Thank you, Mr. Speaker. My questions are for the Minister of Economic Development and Transportation, and they concern the issue of airport infrastructure.

As the minister will recall, I wrote correspondence to him in July of this year regarding concerns that had been brought to my attention about safety deficiencies and other problems at a number of Kitikmeot airports, including the runway lighting system at Gjoa Haven's airport.

Mr. Speaker, can the minister confirm what specific actions have been taken to address the problems at Gjoa Haven's airport, and will he commit to providing the municipality and my office with a comprehensive report on the status of

repair work at the airport? Thank you, Mr. Speaker.

Speaker: Thank you. The Hon. Minister responsible for Economic Development and Transportation, Minister Akeegok.

Hon. David Akeegok: Thank you, Mr. Speaker. I don't have the level of detail in terms of what work was done in the Gjoa Haven Airport at this time, but as he asked for a comprehensive report, I will commit to providing him an update on the work that have been progressing with in the Gjoa Haven Airport. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Akoak.

Mr. Akoak: Thank you, Mr. Speaker. As the minister will recall, his recent reply to my correspondence indicated that "One of the key deficiencies that we have identified in the Kitikmeot airports is a lack of maintenance facilities and secure heated storage for airport maintenance equipment."

Mr. Speaker, in August of this year the federal government announced \$30.0 million in funding for the construction of new facilities at seven Nunavut airports, including Gjoa Haven. Can the minister confirm whether or not a formal contribution agreement for this funding has been signed? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Akeegok.

Hon. David Akeegok: Thank you, Mr. Speaker. I give thanks to the member for asking this very important question. This was approved through the proposal that

we submitted to the National Trade Corridors Fund, all those seven communities. As part of this, the next step is to enter into a contribution agreement. Also, the next step will be, as members are aware with the National Trade Corridors Fund, is that the 25 percent of the funding has to come from this House. As part of our capital request that's going to be coming forward in the new year, we will include those seven. There are a number of steps that still need to take place, but the announcement was very welcoming from the federal government that provided 75 percent of these funds. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Akoak.

Mr. Akoak: Thank you, Mr. Speaker. As the minister will recall, his recent reply to my correspondence indicated that "The Department of Economic Development and Transportation is not considering extending the Gjoa Haven runway at this time...to extend or attempt to pave it would be extremely expensive from both a capital and maintenance perspective. The project is beyond the financial means of the Government of Nunavut and would not meet the criteria of any current federal programs." Mr. Speaker, that is very disappointing to hear.

For the record, can the minister confirm what the cost would be to extend and pave the runway at Gjoa Haven's airport? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Akeegok.

Hon. David Akeegok: Thank you, Mr. Speaker. To extend and accommodate for jet traffic at the minimum for any of our airports, I'm including Gjoa Haven, will be in excess of \$100 million, \$100 million that we don't currently have in any of our budgets. With our current airstrips that are throughout our territory, all of them except for a very few are able to use the current planes that our private carriers are flying. Thank you, Mr. Speaker.

Speaker: Thank you. Oral Questions. The Hon. Member for Kugluktuk, Mr. Pedersen.

Question 1432 – 5(2): Impact of COVID-19 on the Mining Industry

Mr. Pedersen: Thank you, Mr. Speaker. My questions today are for the Minister of Economic Development and Transportation, and they concern the issue of COVID-19's impact on our territory's mining industry. This is an important issue for my region, given the recent acquisition of TMAC Resources by Agnico Eagle Mines.

Mr. Speaker, when my colleague from Baker Lake raised this issue at the beginning of the spring sitting, the minister informed the Legislative Assembly that his department was working with the mining sector to develop plans to get our territory's residents safely back to work. Can the minister provide an update on the status of this work? Thank you, Mr. Speaker.

Speaker: Thank you. Minister responsible for Economic Development and Transportation, Minister Akeegok.

Hon. David Akeeagok: Thank you, Mr. Speaker. I was planning to make a ministerial statement on the return to work and I will continue to do that. It is very important that our workers for the mines be able to come back. For Baffinland and also the two gold mines in the Kivalliq with Agnico Eagle, those two have been able to bring Nunavummiut back to work. We are still working with the Kitikmeot operations for Agnico Eagle and that work will still continue with our Chief Public Health Office. Thank you, Mr. Speaker.

Speaker: Thank you. Your first supplementary, Mr. Pedersen.

Mr. Pedersen: Thank you, Mr. Speaker. I thank the minister for his response. Mr. Speaker, when this issue was last raised during the spring sitting, the minister informed the Legislative Assembly that vaccinations for workers at the mines is a key component of the reopening plan. Based on his discussions with the mining companies, can the minister indicate today approximately what percentage of the Nunavut mining workforce has been fully vaccinated? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Akeeagok.

Hon. David Akeeagok: Thank you, Mr. Speaker. I don't have that information at this time and it would be a fluid number in terms of the jobs that are there continue to change, but I will definitely look into that. Thank you, Mr. Speaker.

Speaker: Thank you. Your second and final supplementary, Mr. Pedersen.

Mr. Pedersen: Thank you, Mr. Speaker. I look forward to seeing those numbers, Mr. Minister.

Mr. Speaker, although Nunavut's operating mines have not shut down completely, it is my understanding that they may not have not been producing at full capacity during the pandemic. Can the minister indicate what the economic impact of the pandemic has been on the mining sector in Nunavut? Thank you, Mr. Speaker.

Speaker: Thank you. Minister Akeeagok.

Hon. David Akeeagok: Thank you, Mr. Speaker. I need to quantify that in terms of how much impact it has. They have been operating in very much smaller capacity and we haven't had that in terms of the impacts that it has for our economy yet, but I'll definitely get that information also. Thank you, Mr. Speaker.

Speaker: Thank you. Members, please note that the time allotted for question has now ended. Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Speaker. Pursuant to Rule 39(7) and seconded by the Member for Amittuq, I move that the time for question period be extended. Thank you, Mr. Speaker.

Speaker: Thank you. Mr. Main, under the new rules, it's not a motion that needs to be put forward; it has to seek unanimous consent. If you could rephrase, please. Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Speaker.

(interpretation ends) Pursuant to Rule 39(7), I seek unanimous consent to extend the time allotted for oral question period by 30 minutes. (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. The member is seeking unanimous consent to extend question period. Are there any nays? There is a nay, so we will proceed with the orders of the day. Item 7. Written Questions. Item 8. Returns to Written Questions. Item 9. Replies to Opening Address. Item 10. Petitions. Item 11. Responses to Petitions. Item 12. Reports of Standing and Special Committees on Bills and Other Matters. Mr. Main.

Item 12: Reports of Standing and Special Committees on Bills and Other Matters

Committee Report 044 – 5(2): Report on the Review of the 2019-2020 Annual Report of Nunavut’s Representative for Children and Youth

Mr. Main (interpretation): Thank you, Mr. Speaker. (interpretation ends) I have the honour of presenting the report of the Standing Committee on Oversight of Government Operations and Public Accounts on its review of the 2019-2020 *Annual Report of the Representative for Children and Youth*.

Mr. Speaker, the 2019-2020 *Annual Report of the Office of the Representative for Children and Youth* was tabled in the Legislative Assembly on September 21, 2020.

The appearance of the Representative for Children and Youth and her staff before the standing committee took place in the Chamber of the Legislative Assembly on June 21 and 22, 2021. Witnesses from the Government of Nunavut’s departments of Education, Family Services, Health, and Justice also participated in the hearing and the standing committee greatly appreciated the frank and detailed nature of the input provided.

Uqaqtitsijii, a number of themes emerged during the standing committee’s review of the Representative for Children and Youth’s 2019-2020 annual report to the Legislative Assembly. Accordingly, the standing committee makes the following recommendations:

1. That the Representative for Children and Youth include in her annual report information on performance measures to track the success of her office in providing its core services.
2. That the Representative for Children and Youth and Government of Nunavut departmental representatives work together to better align information collection and reporting processes.
3. That the Government of Nunavut ensure that the Department of Family Services receive adequate resources and support, especially in areas relating to data collection and addressing staffing needs.

*See Appendix for full text of Committee Report 44 – 5(2).

4. That the Representative for Children and Youth collaborate with the Government of Nunavut departments of Education, Family Services, Health and Justice to identify and implement specific ways to support parents and families in addressing issues related to the care and provision of services to Nunavut's children and youth.
5. That the Government of Nunavut finalize its comprehensive interdepartmental protocol for the coordination of services in respect of Nunavut's children and youth.

Uqaqtitsijii, as the term of Nunavut's Fifth Legislative Assembly draws to a close, I would like to note a number of transitional issues for the next Assembly to take into consideration with respect to the Office of Nunavut's Representative for Children and Youth.

- Subsection 40(1) of the *Representative for Children and Youth Act* provides that the Legislative Assembly or one of its committees shall review the provisions and operations of the Act. While the review will be conducted in a manner determined by the Sixth Legislative Assembly of Nunavut, it is anticipated that the Office of the Representative for Children and Youth will contribute substantively to the process. Of note, section 4(1)(b) of the Act, which provides that the representative may review any matter related to the death or critical injury of any child or youth, is not in force.
- Nunavut's Representative for Children and Youth has indicated

that a report on her office's systemic review of child protection services will be completed by the end of the current fiscal year. Given the high rates of violence and sexual abuse across Nunavut, the Sixth Legislative Assembly of Nunavut may wish to consider striking a special committee to explore this issue in depth.

- The Office of the Auditor General of Canada has twice conducted audits on programs and services for children, youth and families in Nunavut. The 2011 report, *Children, Youth and Family Programs and Services in Nunavut*, included 20 recommendations for Government of Nunavut departments. The 2014 report, *Follow-up report on Child and Family Services in Nunavut*, contained six recommendations for Government of Nunavut departments. The Office of the Auditor General of Canada may wish to consider conducting another follow-up audit in this area which could contribute greatly to addressing issues that have been identified.

Uqaqtitsijii, in closing, the standing committee commends the Representative for Children and Youth for her effort and focus on advocating for the rights and interests of Nunavut's children and youth.

With that, Mr. Speaker, I move that the report of the standing committee be received by the House and entered into the record as read. (interpretation) Thank you, Mr. Speaker.

Speaker: Thank you. The member has moved that the report of the standing

committee be received by the House and entered into the record as read. Do members agree?

Some Members: Agreed.

Speaker: There is agreement. Moving on. Item 13. Tabling of Documents. The Minister responsible for Economic Development and Transportation, Minister Akeegok.

Item 13: Tabling of Documents

Tabled Document 413 – 5(2): 2019 Report on the Administration of the Transportation of Dangerous Goods Act, 1990

Hon. David Akeegok: Thank you, Mr. Speaker. I am pleased to table the 2019 Report on the Administration of the *Transportation of Dangerous Goods Act, 1990*. Thank you, Mr. Speaker.

Speaker: Thank you. Tabling of Documents. The Hon. Member for Baker Lake, Member Simailak.

Tabled Document 414 – 5(2): Photo: Donation of Computers to Baker Lake High School Students

Mr. Simailak: Thank you, Mr. Speaker. Today I would like to table a photograph of 13 Dell laptop computers donated by Mr. Paul Summers of Steelcraft Incorporated to the students of Baker Lake High School to help with their studies.

This is a wonderful example of an individual and organization outside of government doing their part to encourage and support our students

during the difficult times of this pandemic.

Mr. Speaker, these laptops will go a long way in helping the high school students with their studies.

On behalf of the students of Baker Lake, I again take this opportunity to thank Paul Summers for his generosity. Thank you, Mr. Speaker.

Speaker: Thank you. Tabling of Documents. Item 14. Notices of Motions. Item 15. Notices of Motions for First Reading of Bills. Item 16. Motions. Item 17. First Reading of Bills. Item 18. Second Reading of Bills. Item 19. Consideration in Committee of the Whole of Bills and Other Matters. Bill 77 with Mr. Akoak in the Chair.

Before we proceed to the Committee of the Whole, we will take a 20-minute break.

Sergeant-at-Arms.

>>*House recessed at 15:38 and Committee resumed at 16:09*

Item 19: Consideration in Committee of the Whole of Bills and Other Matters

Chairman (Mr. Akoak): Good afternoon, Inuit (interpretation) who are watching the proceedings and listening to the radio broadcast. (interpretation ends) I would like to call the committee meeting to order. In Committee of the Whole we have the following item to deal with: Bill 77. What is the wish of the committee? Ms. Towtongie.

Ms. Towtongie (interpretation): Thank you, Mr. Chairman. We wish to commence with the clause-by-clause review of Bill 77. Thank you, Mr. Chairman.

**Bill 77 – Supplementary
Appropriation (Capital) Act, No.
2, 2021-2022 – Consideration in
Committee**

Chairman: Thank you, Ms. Towtongie. We will now proceed to the review of Bill 77. I would now like to ask Minister Hickes: do you have officials that you would like to appear before the committee? Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes, I do.

Chairman: Thank you. Does the committee agree to let the officials appear before you?

Some Members: Agreed.

Chairman: Thank you. For the record, Minister Hickes, please introduce your officials and proceed with your opening comments. Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. No strangers to the House, Dan Carlson, Deputy Minister of Finance, to my left and to my right, Stephen Mansell, Deputy Minister of Justice.

Thank you, Mr. Chairman and members. I appear before you today to present Bill 77, *Supplementary Appropriation (Capital) Act, No. 2, 2021-2022*. Through this bill we are seeking to increase the government's capital appropriation by \$4.36 million in the

2021-22 fiscal year. Of this, about \$3 million relates to capital carryover adjustments.

For those listening, the need for carryovers comes when departments do not fully expend the capital funds appropriated to them in one fiscal year but still require the authority to spend this money in future years to complete projects. As the Government of Nunavut's appropriation process requires annual approvals, the government asked to carry over funding approved for projects in one year so we can continue to work on them in the next.

Through Bill 71, which members approved in June of 2021, our government agreed to carry over about \$136 million from 2020-21 into 2021-22 in respect of 140 capital projects. I thank the members again for supporting that bill.

To prepare Bill 71 in time for me to introduce it into our Assembly's spring sitting, we needed departments to finalize their carryover requests in late April 2021, just a few weeks into the new fiscal year. Mr. Chairman and members, at that stage, departments may not have had all the information they required to calculate their carryover requirements precisely. They must often estimate their needs using available information. Bill 71 was based on these April estimates.

Throughout spring and summer months, our departments work to finalize year-end amounts and may receive new information related to projects. For example, vendors may submit invoices related to the prior year or accountants

revise their estimates of work in progress. This new information can result in the need to adjust capital carryover amounts.

Mr. Chairman and members, through Bill 77 we are seeking to make about \$3 million in such adjustments across various departments. Your briefing materials include additional information about the specific projects. For any of these carryover adjustments, we are not seeking new money now; instead we are asking to adjust the timing of when already approved funding is available for use.

Mr. Chairman and members, we do have one request not related to carryovers. Specifically the Department of Justice requires an additional \$1.3 million for its Aaqqigiarvik Correctional Healing Facility here in Iqaluit. I do appreciate members will want to know more. The core concern relates to ensuring the safety of our inmates and employees in case of fire. The issue relates to the building's fire suppression system, its sprinklers.

As part of planning and designing this project, we tested the water pressure coming into the building from the City of Iqaluit's water pipes. Our designers selected and built a fire suppression system based around these measurements. The facility itself is now built and, contrary to my opening comments, already has accepted inmates. Unfortunately, when testing the building as part of its final certification process, inspectors found the water pressure coming in from the City of Iqaluit had dropped significantly. As there was less pressure in the municipal systems, it means water does not flow into the

building with enough strength to be reliable in the case of a fire emergency.

We have raised our concerns to the city directly, but they indicate there is nothing they can do to reliably increase municipal pressure. This is obviously not something we can risk. An unreliable system is a major concern for the safety of the inmates, our employees, and the facility itself. We need our fire sprinklers to work every time we need them to. Our inmates need those sprinklers to work.

There is a solution. We can install an industrial pump that takes incoming city water and pressurizes it enough so that it enters our facility at the right strength. The city has accepted that installing such a pump would address safety concerns and has agreed to certify the building on these grounds. The cost of materials and installation will be about \$1.3 million. The department does not have these funds internally. To move forward with this plan and continue to have the doors open to this facility, the Department of Justice requires a supplementary appropriation through Bill 77. Thank you, Mr. Chairman.

Chairman: Thank you, Minister Hickey. Do members have any general comments? Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. Welcome, minister and your officials. I will support this bill to appropriate \$1.3 million, the new funding for the Aaqqigiarvik facility. I will support it personally and I have comments to this.

We all know that the funds for the new Aaqqigiarvik facility have been

discussed here in the House for a time now, and the funds allocated for above allocation was something we didn't expect in going back several months. However, the Department of Justice and the finance department have really identified thoroughly how much they have exceeded or what has not been anticipated, which is before us and I will support, and we don't want any safety concerns, which is a possibility if a fire broke out.

I will personally support it, Mr. Chairman. Irrespective of my support, we shouldn't be exceeding the allocated funds based on the government's budget, but I still believe that this is a very important issue, so I raised it. Thank you, Mr. Chairman.

Chairman: Thank you, Mr. Main. Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Chairman. Good afternoon, minister. Welcome. I will also be supporting the request made by the Department of Justice for the new healing facility. We understand now that when capital projects are being planned, sometimes they don't anticipate what they will need and that's understandable. For that reason, I will be supporting this.

Mr. Chairman, if we can ask a question to the minister's opening remarks, can we ask a question? Thank you.

Chairman: Questions to the opening comments? Mr. Netser.

Mr. Netser: Thank you. I just have a question to the minister regarding his opening comments on the third page where he says that the city has accepted

that installing such a pump would address the safety concerns and has agreed to certify the building on these grounds. My question to the minister is: when the government builds capital projects such as these just in the city, does the city have to certify the project in order to make safety standards? I just need a simple explanation on that. (interpretation) Thank you.

Chairman: Thank you, Mr. Netser. My apologies. Once we go to page by page, you can ask the questions, but at the moment, any general comments? Ms. Towntongie.

Ms. Towntongie: Thank you, Mr. Chairman. (interpretation) I will be supporting this as well. As the minister stated, they're not looking for new funding. However, these are funds that have already been approved previously. I'm thinking that Aaqqigiarvik already has inmates in it and this would be urgent to me if they haven't started utilizing the facility. It states here that Aaqqigiarvik has already accepted inmates. Thank you, Mr. Chairman.

Chairman: Thank you. Mr. Qamaniq.

Mr. Qamaniq (interpretation): Thank you, Mr. Chairman. I, too, will be supporting this. However, when it's time to ask questions, I will want to ask the minister when they first looked into this. The water pressure was appropriate at the time and when they tested it again, it didn't have enough pressure. I will have a question on that when it's time to ask questions, Mr. Chairman. Thank you.

Chairman: Thank you. Any more general comments? Mr. Qirngnuq.

Mr. Qirngnuq (interpretation): Thank you, Mr. Chairman. I also support the minister's request. It's appropriate and useful. We have to use new technologies today. We have a school now that doesn't have such things as sprinklers. They don't have any sprinklers and it has been a problem during the cold season. I don't want to see that elsewhere. I don't think I'll have any questions, but I will support this. Thank you, Mr. Chairman.

Chairman: Thank you. General comments? None. We will now go to the page-by-page review starting on page 4. Supplementary Appropriation (Capital) No. 2, 2021. Mr. Netser.

Mr. Netser: Thank you, Mr. Chairman. I want to reiterate my question or repeat my question on page 3 of the minister's opening comments where he said that the city has accepted that installing such a pump would address safety concerns and has agreed to certify the building on these grounds. My question is: when the government does big capital projects throughout the city, is it normal practice for the city to approve what the government has been building? I realize that this is for safety concerns. (interpretation) Thank you.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. To bluntly answer the member's question, yes, the city does have... . With the development permit, there were two conditions that they put into putting this facility into service; one that this water pump would be installed and two, in the meantime, we actually have people on staff that their sole duty is fire watch. Until we get the sprinkler

system up and operational, we have to keep fire watch staff on duty. Thank you, Mr. Chairman.

Chairman: Mr. Netser.

Mr. Netser: Thank you. Thank you for the explanation, minister. My next question is: when do you expect to have this pump installed in the new facility? Thank you.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. Due to the urgency of this addition to the facility, we have ordered the pump already, using our contingency fund that was available until such time as the House does approve these funds. Hopefully, as many members have spoken in support of it, so until such time as... . We took the opportunity to order the pump already. We barely made the last boat because of the timing, so it is going to be coming this fall and will be installed immediately upon arrival. Thank you, Mr. Chairman.

Chairman: Thank you. Next name on my list: Mr. Simailak.

Mr. Simailak: Thank you, Mr. Chairman. On the pump, was that the cheapest and the best option to go with? Thank you, Mr. Chairman.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. For the demand of what it needs to do to increase the water pressure, from what I understand, it was one of the only options, but Mr. Mansell would have more intimate knowledge of what, if any, other options were looked

at, through you, Mr. Chairman. Thank you.

Chairman: Mr. Mansell.

Mr. Mansell (interpretation): Thank you, Mr. Chairman. (interpretation ends) I thank the member for the question. The original testing came back in April that showed us that we were not at the pressure we were expecting. The pump was the solution that was come up with between the city, the contractor, CGS, and our justice team. Rather than order it then, we directed staff to go back and come up with...well, first work with the city to see if we could resolve the problem and see if there were any other solutions. In June-July it was clear to us that the city was unable to identify the reason why, and between CGS, Justice, and the contractor, they weren't able to identify any other options but with the option we're going with. (interpretation) Thank you.

Chairman: Mr. Simailak.

Mr. Simailak: Thank you, Mr. Chairman. Thank you for your responses. For the installation of the pump, will it be tendered out or will it be sole sourced? I assume it wasn't part of the scope of the work, so this is something new for the project. Thank you, Mr. Chairman.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. It was done as a change order through the existing contractor. Thank you.

Chairman: Thank you. The next name on my list: Mr. Qamaniq.

Mr. Qamaniq (interpretation): Thank you, Mr. Chairman. In his opening comments, it states that the water pressure was tested before the completion and that the water and pipe system had been appropriate the first time that they had tested it. However, when they tested it again, it was apparently lowered. It was enough at first, but then the water pressure dropped and they ultimately had to get a pump and now \$1.3 million is being requested for this new pump.

The city has an obligation to provide such services that the hamlets and communities provide. It would seem appropriate that the city would provide assistance with the cost of the pump through funding since they are responsible for the water system. Perhaps after the project was completed, I don't know if Aaqqigiarvik was handed over to the Government of Nunavut. Furthermore, I would like to know if the city was asked if they could provide assistance through funding, Mr. Chairman. Thank you.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. There was not a request to the city to provide any funding *per se* for this project. Although the water pressure did drop, it still exceeds the minimum standards that they are legally obligated to provide water pressure to the city. It lowered the water pressure to a point where we had to install the pump, but it didn't go low enough that the city is not meeting their minimum standards that they need to provide. Thank you.

Chairman: Mr. Qamaniq.

Mr. Qamaniq (interpretation): Thank you, Mr. Chairman. I asked earlier if he can respond to my question. Did you only notice after the project was completed that the water pressure had dropped or was it before the building was handed over to the Government of Nunavut? Did you only realize it afterwards or before that? Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. If I understand the member's question correctly, when it was tested during the design and architectural phase of the facility, the water pressure was measured, so then the sprinkler system was designed around that threshold. Subsequently, when it was tested in April, as we were bringing the systems online, they could actually see what impact it has when there was notice that there was a drop in pressure.

There are a number of different communications and issues that are spoken about with Community and Government Services and the City of Iqaluit with their municipal city planning. Unfortunately they were not able to increase the pressure sufficiently. We tested again in June and tested again in July.

When the building came into play in September, under the condition that... . Like I said earlier, the city has put two conditions on handing over the authority to open up the building and one is that a fire suppression system with the water pump needed to make that pressure threshold was going to be installed and two, that there would be on-call fire

watch people. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I think I'm going to rephrase my question in English, if I may.

Every major construction, there is a contract signed between the contractor and the owner of the facility. I guess my question is: when somebody found out that the pressure had dropped, was the building already turned over to the Government of Nunavut by the contractor or was it before the building was turned over to the government from the contractor? Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. It was before the building was turned over to the government, during the normal process of making sure that the condition ratings and all the applicable building codes were in place so that the city could provide the declaration on it. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. Isn't it the contractor's responsibility to install the pump or that was not part of the contract? Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. I appreciate the question. Just to make it clear, when the water pressure

was measured during the design phase of the building, the contractor, the City of Iqaluit, and even we have no control over why it dropped exactly. Basically, to be able to turn the building over to the Government of Nunavut, we had to meet those minimum standards of a fire suppression system, which we weren't able to do without the water pump. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I thank the minister for his answers. I would like to ask whether the City of Iqaluit waived the development permit fee since this problem is looked after by the city. Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. No, to put it frankly, and to be blunt, probably the legal battle that would come out of that and ultimately it would be our responsibility as the builder to make sure that we're designing and building to meet these minimum requirements.

I would anticipate that there would be no fault to who would be to blame for the drop in water pressure. There have been other construction projects around the city. There have been leaks identified in the past that they looked into. It's just an unfortunate set of circumstances where the water pressure dropped just below the threshold needed to be able to sign off on turning the building over to the Government of Nunavut without having an adequate fire suppression system available. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I appreciate Mr. Minister's answers. I wonder if it will affect the old Baffin Correctional Centre and perhaps this new pump will eventually be used by the two facilities. Thank you, Mr. Chairman. I think this is my last question. Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: I'm going to say with all sincerity that I hope this fire sprinkler system never gets used in either sides of the building, but it was taken into consideration during the phase 2 operations and renovations of the Baffin Correctional side of things. This pump will be adequate to provide sufficient water pressure when both buildings are back online. Thank you, Mr. Chairman.

Chairman: Thank you. Last name on my list on this page: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) I don't have too many questions. The briefing material that has been provided to us mentions on page 2 of 2 that "Installing the pump will allow the department to open the facility on time. This means the GN can move inmates from the Baffin Correctional Centre into the facility and bring about 30 inmates home to Nunavut from Ontario, and begin the next phase of the project to renovate the Baffin Correctional Centre."

I'm just trying to understand. I know that there was an opening ceremony that was held recently. At what phase or at what

point is this project right now? Is the first phase complete? Have these 30 inmates that are mentioned been brought home to Nunavut from Ontario? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes, phase 1 is substantially complete. In response to the member's question, there weren't 30 inmates in Ontario anymore through different releases or other conditions of their incarceration had changed. I believe there were 10 that were repatriated to Nunavut in the last... I believe it was Friday night that the inmates got back into Iqaluit and the first inmates were moved into the new facility on September 3. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. Thank you, minister. (interpretation ends) The next bullet in our briefing material mentions that "With little choice, the Department of Justice ordered the fire pump and expects it will be ready in October 2021." The minister mentioned sealift schedules in trying to get on the last ship.

It's very uncommon for members to be asked to approve an expenditure that has already been decided. I believe that every expenditure has to be charged through an appropriation and, in this case, the appropriation is coming after the expenditure. I believe there are contingency funds for the project; if the minister can explain where the funds to place the order of the fire pump have

been charged currently. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. I appreciate the member's question. Like I briefly kind of touched on in one of my earlier responses, we did tap into the contingency fund to order the pump itself. That being said, we're anticipating that it would have left a shortfall in the contingency fund. To put forward the project now makes the most sense.

In addition to this additional cost, the pump itself is only a portion of the money that we're requesting. There is installation and shipping and everything associated with it, whereas if we would have just left those expenditures under the current contingency fund, we would have had to come back on a potentially more urgent basis to cover any shortfalls that the contingency fund would normally be able to cover. It might impact the phase 2 opening or even some of the construction if and when challenges do arise, as they typically do, and that's why we put contingency funds into these projects.

We still kept within the Financial Administration Manual and the *Financial Administration Act* in procuring this pump, but at the same time it would have anticipated leaving us short in any contingency needs, where we would have had to get it appropriated in the House and as we all know, we only meet a few times a year, so it might have really jeopardized phase 2 of the project. It's much more prudent to go forward with this appropriation at this

time to make sure there are no shortfalls later. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. Thank you, minister. (interpretation ends) What is the breakdown of the \$1.3 million? The minister mentioned that just a portion of it is the pump. I'm looking for a rough breakdown in terms of the equipment and the installation cost. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Thanks, Steve. I do have this paper somewhere, but it saved me the time to find it.

Just to give a full breakdown, additional design costs, plus or minus \$150,000; procurement and shipping of the pump, just under \$400,000; connect to the water system, a little over \$90,000; electrical work, plus or minus \$150,000; foundation, plus or minus \$200,000; and closure for the pump, plus or minus \$200,000, so an approximate total of just under \$1.2 million, with a contingency built into that of just under \$120,000, bringing a total construction cost of \$1,307,000. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) Thank you, minister. When I read the briefing material, sometimes as regular MLAs we're reading between the lines a little bit and the phrasing in the briefing material is with little choice, and from the minister's opening comments, I get

the sense that this was a very urgent need for the facility.

However, recognizing that, as I mentioned earlier, it's very uncommon, it's rare that we would see this type of appropriation being brought forward. I think it was early in this Assembly, a different department, and it concerned airport capital expenditures and I believe the minister was himself at the time a regular member. I guess that's just a comment; it's not really a question.

Just a final comment, Mr. Chairman, if you will allow, I have been told that there are other issues in other communities in Nunavut, specifically Rankin Inlet, regarding water pressure of their utilidor system and that, I believe, has also been impacting development in that community. Just in my comment, I'm just highlighting that as an issue of concern in terms of the cost of development. No further questions. (interpretation) Thank you, Mr. Chairman.

Chairman: That just being a comment. I have no other names on this page. Supplementary Appropriation (Capital) No. 2, 2021-2022. Justice. Not Previously Authorized. Total Department. \$1,289,000. Agreed?

Some Members: Agreed.

Chairman: Page 5. Education. Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Chairman. With the two capital projects under the Department of Education and the new schools, we have the Naujaat high school at -\$69,000.

What was it used for? That's my first question. Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Just an example of some of the work that's anticipated is door installation, door locks, window seals and soundproofing between classroom walls, and some additional work required in the closed circuit TV cameras and paging system. Thank you, Mr. Chairman.

Chairman: Mr. Netser.

Mr. Netser (interpretation): This - \$69,000 will be going back to the government. What if there is a need to utilize that \$69,000 to make improvements to the high school? Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. To maybe clarify for all members, the \$69,000 was money that's not going back to the government. It means that it was spent in the correct fiscal year. When we did Bill 71 back in June, departments did their best estimates at that time on what type of capital carryovers that they would need. Subsequent to invoices being received or work that was completed in the right fiscal year, this is just an adjustment to that, so there is no money going back to the government. It's just stating that that amount of work was completed under the correct fiscal year without needing to be carried over. Thank you, Mr. Chairman.

Chairman: Mr. Netser.

Mr. Netser: Thank you, minister, for the explanation. Now, for Coral Harbour's Sakku major renovation/addition, the \$50,000 that was not used, I would like to know; the tender for the major renovations was way over-budgeted. Can the minister explain to the House and to the listening audience what this \$50,000 entailed to? (interpretation) Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Basically that was for the planning process, which did not stop for the Coral Harbour school. Thank you, Mr. Chairman.

Chairman: Thank you. That was the last name on this page. Education. Not Previously Authorized. Total Department. -\$754,000. Agreed?

Some Members: Agreed.

Chairman: Page 6. Community and Government Services. Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) This is regarding carryover amounts and so I appreciate that this is capital carryovers and it's adjusting the amounts for different projects, and most of these are getting adjusted upwards.

The EAUFON marine survey and the ICIP undersea fibre optic cable projects are included. It's no secret that I have expressed concerns over this project. It's a major undertaking and I'm concerned about the planning, the management and execution of this project. I'm concerned that it's a megaproject and I'm concerned that it could end up being a

bit of a project that is larger than we believe due to planning and budgeting issues around this.

Mr. Chairman, anytime you have governments...this is a worldwide phenomenon. Anytime you have governments making investments in information technology, in terms of public accounts, in terms of expenditures, that's something to keep an eye on very closely and the Nunavut government, in my opinion, is no exception. This needs to be managed very closely.

Given that this department has had turnover at the senior management level, who is currently managing this fibre optic project? I ask it in the context of this \$137,000 increase for the fibre optic cable item that's listed here.

(interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Just as Mr. Carlson is directly involved in this process with the community and government services deputy minister, it might be best for him to respond to give the member the detail he is looking for.

Chairman: Mr. Carlson.

Mr. Carlson: Thank you, Mr. Chairman. Yes, this is a very big project and it's important that we do it well. In terms of the oversight and the management, the Department of CGS is responsible, but it's done with a steering committee of senior executive levels from different departments. For example, I sit on it, the deputy of EIA

sits on it, CGS leads it, and there's a team underneath them of individuals within CGS' IMIT, the information management and technology side of their shop. This is too big for one team or one entity, so there are many people involved with overseeing where this project is going. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) I guess I should be more specific with my questioning. Within the lead department, CGS, who is responsible for this project? Is it the deputy minister? Is there a project manager? I'm trying to understand who is overseeing this fibre optic cable project from the lead department's management perspective. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Although a number of departments are involved, the lead of all of that would be the Deputy Minister of Community and Government Services, Kyle Seeley. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) The briefing material that we have been provided, on page 4 of 4, it says that "The planning exercises have resulted in additional opportunities with the Kativik Regional Government, which the GN will explore and continue." It says, "Consequentially, the planning process has been stretched to conclude in 2021-

22, where carryover funds will be required.”

I'm unclear. It has been a while since I've had a briefing on this project and I have been trying to keep up to date on what is happening with it. With this phrase, “the planning process has been stretched,” is that to align with the Kativik Regional Government? I'm just looking for an explanation on that particular phrasing. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes, the member's assumption is correct. To make sure that we're aligning with other similar projects from other jurisdictions that we can potentially partner with, we're trying to align our schedules with those. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you. (interpretation ends) Thank you, minister. Our briefing material continues. It says, “Current funding will allow for the completion of consulting contracts and provisions for new contracts, while finishing up the design phase of the project in-service date in spring 2024.” That is new information, the 2024 date. I'm curious as to what the timeline is in terms of significant milestones for this project to have it in service by spring 2024. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. As Mr. Carlson is a part of

that committee working group, it might be best suited for him to respond, through you, Mr. Chairman.

Chairman: Mr. Carlson.

Mr. Carlson: Thank you, Mr. Chairman. Thank you for the question. Looking at some milestones in front of me, one of the next ones, as the member noted, there has been lots of planning so far, as part of that, they have been exploring different possible routes. A little while ago, for example, they were talking about going to Greenland. Now we're exploring, it's easy enough to say, up through Quebec, but Quebec is a big place and there are a lot of different routes to go up through there.

Where we're at now is we're to the point where we have a sense of what some of those routes are. We need to figure out which route would make the most sense for Nunavummiut, so which would be most resilient and cost effective. Once that happens, some of the other things that we would need to do is do a final marine survey, we would need to do some submarine and land-based construction, we would need to complete that construction that looks like it will take about a year, and then we need to commission and commissioning, of course, is getting it up and running, so that will likely take another year. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) Thank you, Mr. Carlson and minister. One of my biggest concerns about this project is that, to my knowledge, there is nobody within the Government of

Nunavut who is a fibre optics marine cable expert. There is no expertise within the Government of Nunavut. We're embarking or the government is hoping to embark on a project through uncharted waters, I guess I would call it. How many different contracts are currently in place in terms of the management and the support for this project? I have been following it on the Nunavut Tenders website, but just for the record, how many contracts are currently in place that are supporting the GN or CGS for this project specifically? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. The information that I have is that the prime technical consultants, DRG Undersea Consulting, are working with Community and Government Services' fibre project team. If there are any additional contracts, I would have to consult with my colleague and get back to the member. Thank you.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) I'm going to return to this project in-service date in spring 2024. Looking at the spring 2024 end date, when does the contract for the installation of the cable need to be funded and approved in this House in order to meet that spring 2024 goal? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. From what I understand, in

the next year there would have to be contracts awarded once the routes and the services were established, so we would be anticipating any construction costs by January 2022. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) Am I correct to assume or to infer that very early in the life of the next government, there would have to be major appropriations made by the Sixth Assembly in order to meet this 2024 goal? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) One of my largest concerns with this project is that the Government of Nunavut does not have any partners when it comes to the ownership. There's fibre optic, Kivalliq hydro-fibre project, which is currently led by the Kivalliq Inuit Association in my home region, and it would be amazing if we could have partial ownership by another entity than the Government of Nunavut for this project as well, which would free up some more capital dollars for our government.

At these early planning stages of the project, is there any room for private sector or Inuit organization investment

in this asset or has that door closed and it has been decided that this asset will be owned 100 percent by the Government of Nunavut? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. That would be a decision that the Sixth Assembly would have to make, but we're doing our due diligence in a way, like the member mentioned he has been following RFPs on this project, where part of what we're looking at doing is undersea mapping of western Hudson Bay to potentially link up with a line if it does come up from Manitoba. We're doing our best to cover all our bases and options so that as these opportunities arise, if there are opportunities to partner, then we have all the information available to make an informed decision or so the Sixth Assembly can make an informed decision. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) Thank you, minister. On page 3 of 4 it does mention mapping or connection points to future expansion in western Hudson Bay, and there was some recent correspondence between the Kivalliq Inuit Association and Community and Government Services on that activity. The Minister of CGS' response to the Kivalliq Inuit Association led me to understand that the GN is investigating those routes for redundancy purposes. These lines, if they ever were constructed, would be as a backup and it mentions specifically Rankin Inlet and Arviat.

I'm trying to put together the pieces of information from different sources, but I want to make sure that what we are doing or what our future government is doing doesn't duplicate what, in the Kivalliq Inuit Association's case, what they are already planning and working towards. What is the Department of CGS doing to make sure they're not duplicating efforts being made by private sector or Inuit associations? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Basically in a nutshell, we don't know exactly what options are going to be available when the decision-making time comes as of this moment, but I will say that the Kivalliq Inuit Association's initiative and our approach are both the same: we want to make sure that Nunavut communities are connected. If there is an opportunity to partner or to look at enhancing each other's projects, I'm sure that those opportunities will be explored down the road. Thank you, Mr. Chairman.

Chairman: Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. (interpretation ends) My last question is regarding access to the undersea mapping data. I have asked questions to the Department of CGS on this in the past; the answer was not exactly clear, so I'll ask it in this context. Is the data accessible to private sector entities that want to access the data to plan their own projects or is the data retained by the Government of Nunavut exclusively? (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. As the contractor, the data would be owned by us and the contractor, depending upon the specific conditions of the contract. At this time there is not any anticipation of putting it out there publicly, but if there would be an opportunity or if anyone wished to have access to that information, any applications would be entertained. Thank you, Mr. Chairman.

Chairman: Thank you. Next name on my list: Mr. Netser.

Mr. Netser: Mr. Chairman, the minister is raising his hand. Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you. I probably don't need to even say this, but there is not a desire to hide this information; it's just that if the use of it impacts any future projects that we're having, we do want to maintain control of it. I'm not saying we will exclude anyone specifically, but I do want to make sure that we protect ourselves as well too. Thank you, Mr. Chairman.

Chairman: Thank you. Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Chairman. (interpretation ends) I've just got only one question. It was on the news not too long ago when they were advertising and as technology evolves more and more, there was this talk about the low-orbiting satellites. Has the department or the government looked at that option as it may be a possible avenue to go down rather than going through fibre optics? Wouldn't it be

cheaper? I think it's a reality out there and I know that there are low-orbiting satellites providing Internet, I believe, through the military as well. (interpretation) Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Through you, as Mr. Carlson is a part of that working group that would be discussing these options, through you, Mr. Carlson would probably be best suited to respond to that question. Thank you.

Chairman: Mr. Carlson.

Mr. Carlson: Thank you, Mr. Chairman. Yes, the low-earth orbiting technology is certainly on our radar, no pun intended, and as are different types. Broadband is one technology. These LEO, the low-orbiting, are another. What we want to do is find a system that provides the best service and that's likely going to be a mix of technologies. Broadband might be appropriate for some communities and LEO, these low-earth, might work better for others. What we want to do is encourage, design, and build a system that is making the best use of all the technologies. Thank you, Mr. Chairman.

Chairman: Thank you. The last name on my list: Mr. Qamaniq.

Mr. Qamaniq (interpretation): Thank you, Mr. Chairman. In the briefing materials provided to members, the project for Grise Fiord is written in English like this: (interpretation ends) Grise Fiord NCC building fuel spill. I thought the government bought NCC

buildings and I don't know why the Government of Nunavut is still calling it "NCC building" when they bought the buildings. Maybe perhaps the minister can elaborate on what this means. Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. I don't have that level of detail with me. This is just an adjustment to the capital carryover for the project. I'll make note of it and get information from the department for the member, but I just don't have that level of detail here with me. Thank you.

Chairman: Mr. Qamaniq.

Mr. Qamaniq (interpretation): Thank you, Mr. Chairman. (interpretation ends) I'll be waiting to hear back from the minister.

On the same page, 2 of 3, of the briefing notes, on top, Rankin Inlet new arena, it goes on to say that "Including potential legal fees related to the project delays," is the Nunavut government anticipating that there might be potential legal fees related to the project? Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. As I know all members are fairly comfortable with me when I say that I'm always leery of talking about any potential litigation measures, there have been a couple of warranty issues with that building. I'm hoping it doesn't have to go a legal route, that there can be agreements come to, but that's all I can

really speak to that right now. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I thank the minister for answering my question. On the same page under Nunavut CTI upgrades, I'm not too familiar with what CTI means. I think it has to do with communication technology infrastructure. It goes on to say, "New satellites and fibre projects." Maybe perhaps the minister can elaborate a little bit about what this particular line of notes is supposed to mean. Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes, the member is correct; it's community technology infrastructure. Again, these projects were previously approved. This is just a capital carryover adjustment. I don't have all the level of detail. Through the original appropriation through Bill 71, I was hoping that most questions were responded to. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I thank the minister. I've got a couple of more questions, if I may. On page 3 of 4 on top of the briefing notes, Nunavut EAUFON marine survey, and I'm glad that the government is considering for future expansion to North Baffin and it wasn't identified in the previous meetings and I would like to thank the government for considering including North Baffin. It says, "Carryover funds to complete planning and procurement contracts by March

2022.” It’s only a comment, really, Mr. Chairman.

My last question under the same page, Nunavut Emergency Treatment Plant, the project is to design and build a portable water treatment plant that could be transported to most communities. It goes on to say that the project is expected to be completed by March 2022. If this particular supplementary appropriation capital for 2021-22 is approved, will the government then start to lay out RFPs to design the portable water treatment plant? Thank you, Mr. Chairman.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Yes. Thank you, Mr. Chairman.

Chairman: Thank you. Last name on my list: Mr. Netser.

Mr. Netser: Thank you, Mr. Chairman. I have a question here and it’s on page 2 of 4 of the briefing notes and the Grise Fiord NCC building fuel spill, and I have a question here. The note says that “This project will replace flooring and drywall materials in the NCC mechanic room caused by the fuel spill from the tank. Awaiting cost estimates from Qulliq Energy Corporation remedial activities expected to be completed by March 2022.”

I know it’s just a follow-up to my colleague’s question. I would think that if this is NCC’s building, they would be held responsible for the fuel spill costs from the tank. Whose building is this and are we paying for repairs that don’t

belong to the Government of Nunavut? (interpretation) Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. While I don’t know the exact building ownership status, I know we did purchase some buildings from NCC in the last couple of years. Many lease agreements come into play. Like the Legislative Assembly, before we arranged a purchase, if something went wrong, we had to do the repairs in a lot of cases. It depends upon the leasing contract with the company and the building itself. Thank you.

Chairman: Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Chairman. (interpretation ends) I know we are required to have insurance coverage on our buildings when incidents like this happen, a fuel spill, that the insurance company pays for it. We don’t know who this building belongs to. They did not have insurance? That’s my question. (interpretation) Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Like I had stated earlier, these projects have been in play for over a year now for the majority and this is a carryover. It’s just basically making an adjustment to monies that weren’t able to have been expended under the last fiscal year to carry it over. Again, I don’t have that level of detail. During the appropriation when the monies were appropriated, I’m sure there were many questions asked on the need for these projects. If the member is comfortable

with the fact that I can get him that information, I would appreciate it. Thank you, Mr. Chairman.

Chairman: Okay. We're on page 6. Community and Government Services. Not Previously Authorized. Total Department. \$2 million. Agreed?

Some Members: Agreed.

Chairman: Page 7. Economic Development and Transportation. Not Previously Authorized. Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. In the briefing notes it says here that through Bill 77, Economic Development and Transportation is now seeking to adjust the capital carryover requirement for two projects; \$946,000 for its Pond Inlet marine infrastructure and \$811,000 for the Iqaluit marine infrastructure. Does this mean that the Pond Inlet marine infrastructure is delayed for another year for completion? Thank you, Mr. Chairman.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. No, basically what it means is that we would need to carry over these funds to complete the projects. Thank you, Mr. Chairman.

Chairman: Mr. Qamaniq.

Mr. Qamaniq: Thank you, Mr. Chairman. I thank the minister. What's the Inuit employment percentage for both port projects? Thank you, Mr. Chairman.

Chairman: Minister Hickers.

Hon. George Hickers: Thank you, Mr. Chairman. I don't have the exact numbers, but in one of my latest briefings, if I recall correctly, both were over the minimum. Thank you, Mr. Chairman.

Chairman: Thank you. That was the last name on my list on this page. Economic Development and Transportation. Not Previously Authorized. Total Department. \$1,757,000. Agreed?

Some Members: Agreed.

Chairman: Page 8. Mr. Main.

Mr. Main (interpretation): Thank you, Mr. Chairman. This is for the Department of Family Services. I don't have a question. I just wanted to comment that I fully support that as we always hear from the Department of Family Services that they don't have any office space in some of the communities, although they have a big responsibility for family services. I would like to support this project. I wanted to mention that, Mr. Chairman. That's all. Thank you.

Chairman: It's just a comment, Mr. Main. Ms. Towtongie.

Ms. Towtongie (interpretation): Thank you, Mr. Chairman. My apologies; I am the one that mentioned that the (interpretation ends) Eskimo Point Lumber Supply building, (interpretation) which is the office building in Rankin Inlet that we use for woodworking, and the Department of Family Services will make tenant improvements to have an office in that building and it will be used for counselling services. I am aware that the Hamlet of Rankin Inlet has a zoning

by-law. There are zones designated for residential lots, commercial lots, industrial areas, and the Eskimo Point Lumber building is within the (interpretation ends) industrial area.

(interpretation) My question is: why is an industrial building looking at accommodating an office building for the Department of Family Services all of a sudden? I ask that question because I am concerned. I know that the governments are lacking office space, but the building will be repurposed for their needs, but how will they suddenly turn it into an office building? It is right beside the airport and land near airports should be used for industrial purposes. How did the government suddenly decide to build office buildings where the building supply is located? It's fine if there is no response; I just want to comment on that, Mr. Chairman. Thank you.

Chairman: Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Again, I assume that most of those questions were asked during the project approval through the original appropriation for this project. This is just a carryover of leasehold improvements to make. They are at approximately 90 percent complete; they just need to finish off the work. Thank you, Mr. Chairman.

Chairman: Ms. Towtongie.

Ms. Towtongie: Thank you, Mr. Chairman. Thank you, minister, for your response. It's just troubling to me because the Hamlet of Rankin Inlet has a zoning by-law for residential use, heavy industrial, and medium industrial,

mainly because we are under a forced growth due to the mine.

Just seeing the Eskimo Point Lumber Supply building in Rankin Inlet, the department needs to make tenant improvements so it can be occupied by family wellness staff. It's just surprising to me that a family wellness staff office building would be around the airport and that's for industrial use. I am just trying to clarify in my mind: how did the government get away with it? Maybe they followed the proper procedures and the proper course.

It's just a comment and just something I am surprised that the zoning by-laws were not, I am assuming, adhered to or maybe they were adhered to, but the Eskimo Point Lumber Supply by the airport, the hamlet did set it aside for light to medium industrial area, where the downtown area is for commercial office space, and it's just surprising to me. That's all. Thank you.

Chairman: Thank you. We are on page 8. Family Services. Not Previously Authorized. Total Department. \$63,000. Agreed?

Some Members: Agreed.

Chairman: Okay. Go to Bill 77 in your legislation binders.

I think everyone is ready. Bill 77, *Supplementary Appropriation (Capital) Act, No. 2, 2021-2022*. Clause 1. Agreed?

Some Members: Agreed.

Chairman: Clause 2. Agreed?

Some Members: Agreed.

Chairman: Clause 3. Agreed?

Some Members: Agreed.

Chairman: Go to Schedule on page 2. Schedule. Supplementary Amounts Appropriated for the Fiscal Year Ending March 31, 2022. Vote 2: Capital. Total Supplementary Appropriation. \$4,355,000. Agreed?

Some Members: Agreed.

Chairman: Clause 4. Agreed?

Some Members: Agreed.

Chairman: Clause 5. Agreed?

Some Members: Agreed.

Chairman: Clause 6. Agreed?

Some Members: Agreed.

Chairman: Clause 7. Agreed?

Some Members: Agreed.

Chairman: Do members agree to Bill 77 as a whole?

Some Members: Agreed.

Chairman: Do members to put Bill 77 on the orders of the day for third reading?

Some Members: Agreed.

Chairman: Thank you. Closing comments for minister, Minister Hickes.

Hon. George Hickes: Thank you, Mr. Chairman. Just very briefly, I would like to thank my two witnesses here. I know we didn't have to call on Mr. Mansell much, but I appreciate all the work that goes into preparing me for these appearances.

Just with respect to the Aaqqigiarvik facility, I really appreciate the support. I know there were some concerns on how it was spent, but I can assure all members of the legislature and of the public that at no time were any infractions or bending of the rules made. We did spend from appropriated dollars. This was just to make sure that we're covering all our bases, to make sure that if there are any further conditions that need to be met, we can do so with the remaining contingency.

I thank members for all their questions and due diligence on these projects, and I look forward to continuing in the Sixth Assembly with some of these projects. Thank you.

Chairman: Thank you. Sergeant-at-Arms, please escort the witnesses out. I thank you. What is the wish of the committee? Mr. Netser.

Mr. Netser (interpretation): Thank you, Mr. Chairman. (interpretation ends) I would like to report progress. (interpretation) Thank you.

Chairman: Thank you. We have a motion on the floor to report progress and the motion is not debatable. All those in favour of the motion. All those opposed. The motion is carried. I will now rise to report progress.

Speaker: Good afternoon, members. Welcome back. Report of the Committee of the Whole. Mr. Akoak.

Item 20: Report of the Committee of the Whole

Mr. Akoak: Thank you, Mr. Speaker. Your committee has been considering Bill 77 and would like to report that Bill 77 is immediately ready for third reading. Mr. Speaker, I move that the Report of the Committee of the Whole be agreed to. Thank you, Mr. Speaker.

Speaker: Thank you. There is a motion on the floor. Is there a seconder? Thank you, Mr. Kusugak. The motion is in order. All those in favour. Opposed. The motion is carried.

Item 21. Third Reading of Bills. The Hon. Minister of Finance, Minister Hickers.

Item 21: Third Reading of Bills

Bill 77 – Supplementary Appropriation (Capital) Act, No. 2, 2021-2022 – Third Reading

Hon. George Hickers: Thank you, Mr. Speaker. I move, seconded by the Hon. Member for Arviat South, that Bill 77, *Supplementary Appropriation (Capital) Act, No. 2, 2021-2022*, be read for the third time. Thank you, Mr. Speaker.

Speaker: Thank you. The motion is in order. To the motion.

An Hon. Member: Question.

Speaker: Question has been called. All those in favour. Opposed. The motion is carried and Bill 77 is ready for assent.

Item 22. *Orders of the Day*. Mr. Clerk.

Item 22: Orders of the Day

Clerk (Mr. Quirke): Thank you, Mr. Speaker. Just a reminder that the Standing Committee on Legislation meets tomorrow at nine o'clock in the Nanuq Boardroom.

Orders of the Day for September 14:

1. Prayer
2. Ministers' Statements
3. Members' Statements
4. Returns to Oral Questions
5. Recognition of Visitors in the Gallery
6. Oral Questions
7. Written Questions
8. Returns to Written Questions
9. Replies to Opening Address
10. Petitions
11. Responses to Petitions
12. Reports of Standing and Special Committees on Bills and Other Matters
13. Tabling of Documents
14. Notices of Motions
15. Notices of Motions for First Reading of Bills
16. Motions
17. First Reading of Bills
18. Second Reading of Bills

19. Consideration in Committee of
the Whole of Bills and Other
Matters

20. Report of the Committee of the
Whole

21. Third Reading of Bills

22. Orders of the Day

Thank you.

Speaker: Thank you. This House stands
adjourned until Tuesday, September 14,
at 1:30 p.m.

Sergeant-at-Arms.

www.assembly.nu.ca

Mr. Speaker, I have the honour of presenting the report of the Standing Committee on Oversight of Government Operations and Public Accounts on its review of the 2019-2020 Annual Report of the Representative for Children and Youth.

Nunavut's *Representative for Children and Youth Act* was passed in 2013 and provides for the Commissioner of Nunavut to appoint, on the recommendation of the Legislative Assembly, a Representative for Children and Youth for a five-year term of office. Nunavut's second Representative for Children and Youth, Ms. Jane Bates, was appointed on June 6, 2019.

Mr. Speaker, section 35 of the *Representative for Children and Youth Act* requires the Representative for Children and Youth to prepare and submit an annual report to the Speaker of the Legislative Assembly on the conduct of the office and the discharge of its duties during the preceding year. The Representative has a number of areas of responsibility related to the rights and interests of children and youth, including advocacy and advice regarding government services for children and youth, as well as the administration of the office.

The 2019-2020 annual report of the Office of the Representative for Children and Youth was tabled in the Legislative Assembly on September 21, 2020.

The standing committee's televised hearings on the annual reports of independent officers of the Legislative Assembly provide an opportunity for the issues raised in the annual reports to be discussed in a public forum.

The appearance of the Representative for Children and Youth and her staff before the standing committee took place in the Chamber of the Legislative Assembly on June 21 and 22, 2021. Witnesses from the Government of Nunavut's departments of Education, Family Services, Health, and Justice also participated in the hearing and the standing committee greatly appreciated the frank and detailed nature of the input provided.

Following the hearing, the standing committee was pleased to receive additional information from the Department of Family Services. It is anticipated that information will also be provided by the Departments of Health and Education as committed to during the proceedings.

The standing committee's hearings were televised live across the territory and transcripts are made available on the Legislative Assembly's website.

Mr. Speaker, a number of themes emerged during the standing committee's review of the Representative for Children and Youth's 2019-2020 Annual Report to the Legislative Assembly. Issues ranging from the format and content of the Representative's annual report, the role and capacity of government departments in providing services to Nunavut's children and youth and concerns relating to violence and abuse were all addressed in some detail during the Representative's appearance before the standing committee.

Accordingly, the standing committee makes the following recommendations:

- 1. That the Representative for Children and Youth include in her annual report information on performance measures to track the success of her office in providing its core services.**

Mr. Speaker, the standing committee notes that the format and content of the Representative for Children and Youth's annual report has evolved from annual reports of previous years. Members welcome the latest changes and encourage the Representative to continue working to enhance the quality of information included in her annual reports. Members greatly appreciated the level of detail provided with respect to the status of cases and issues addressed by the office. However, a description of the measures used to evaluate and monitor the office's ongoing performance in conducting its various activities was not included.

In its October 2016 report on the review of the Representative's 2014-2015 Annual Report, the Standing Committee on Public Accounts, Independent Officers and Other Entities of the 4th Legislative Assembly of Nunavut recommended that:

"The Representative for Children and Youth establish measures to track the success of her Office in addressing requests or inquiries relating to each of its core services"

The committee noted that "it is ... important to put measures in place from the outset that will enable the Representative to evaluate which procedures are effective in reaching their desired objectives and which ones need to be changed or modified to achieve greater success." The 2019-2020 annual report does not indicate what, if any, performance measures are being applied to the operations and outcomes of the office's work. Such measures can be useful to determine the allocation of resources as well as evaluating the effectiveness of specific activities.

In the "Looking Forward" conclusion to the Representative's 2019-2020 annual report it states, "we will implement new policies and service standard changes internally." Members anticipate that an overview of these changes and their expected outcomes will be included in the Representative's future annual reports.

In its "Monitoring of Recommendations" section, the 2019-2020 Annual Report lists a number of recommendations related to legislative initiatives. It was unclear to the standing committee how the Representative intended to follow up on the implementation of these recommendations, especially in those cases where the legislative process is already completed. Members caution that recommendations submitted with respect to legislative initiatives may be addressed differently than recommendations regarding changes or improvements to policies, practices and procedures affecting the delivery of services for children and youth.

During the committee's hearing, departmental officials noted that the Representative's annual report did not include narratives, which had been included in previous reports under the heading "Advocate's Applause", describing departmental activities that were particularly successful in promoting and protecting the rights of children and youth.

By previously encouraging the Representative to focus her annual reports more directly on specific activities and outcomes, the Standing Committee on Public Accounts, Independent Officers and Other Entities may have inadvertently failed to support the inclusion of information that highlights proactive and successful initiatives undertaken by departments in providing services to children and youth across Nunavut.

The Standing Committee on Oversight of Government Operations and Public Accounts therefore encourages the Representative to re-consider the inclusion of "best practices" examples in her future annual reports to provide additional perspectives of how Government of Nunavut departments could improve services and support to Nunavut's children and youth.

2. That the Representative for Children and Youth and Government of Nunavut departmental representatives work together to better align information collection and reporting processes.

Mr. Speaker, a key section of the Representative's 2019-2020 annual report focuses on data and statistics from government departments with the intent of establishing baseline information on the "Status of young Nunavummiut". For every department surveyed, a number of the indicators identified by the Office of the Representative were identified as either unreported or untracked. Having accurate data is important for the government to be able to plan for and address critical issues that face children and youth across the territory. The Representative has very clearly articulated that is not clear how departments can ensure that services are being adequately provided if they do not have the relevant information readily available.

The standing committee fully supports the collection of enhanced statistical information which can help to provide additional insight to the challenges and issues faced by Nunavut's children and youth and the provision of services to help address them. The committee recommends that the Representative's annual reports note the number of requests for information that are submitted to departments with a record of whether the requests were answered or not.

During the course of the standing committee hearings, it became apparent that the lack of data for some indicators was due to the fact that the departments did not always collect information within the same parameters as those identified by the Office of the Representative. In some cases, the lack of congruence between the way the information was requested and the way it was actually recorded and provided may have also led to some inaccuracies in the reporting of the data.

Of greater concern, however, is those areas where information is missing because it was not recorded. Throughout the hearings, there was discussion with respect to the lack of capacity and resourcing on the part of all departments, but most particularly the Department of Family Services, to fulfill their responsibilities in this area.

In addition, the Representative remarked on a lack of consistency in the practices and processes of delivering services for children and youth including a lack of consistency in ensuring that children's or youth's wishes are taken into consideration during this process.

3. That the Government of Nunavut ensure that the Department of Family Services receive adequate resources and support, especially in areas relating to data collection and addressing staffing needs.

Mr. Speaker, the Department of Family Services began its role as a Government of Nunavut department on April 1, 2013. It has been noted on several occasions that the department has faced a number of challenges in establishing its mandate and delivering services consistently while addressing ongoing infrastructure and staffing issues. In March of 2014, the report of the Office of the Auditor General of Canada "*Follow-up Report on Child and Family Services in Nunavut*" made a number of recommendations specific to the Department of Family Services with respect to staffing, workload standards, training, the collection of information and community engagement efforts.

In its report on the Auditor General's findings, the Fourth Assembly's Standing Committee on Public Accounts, Independent Officers and Other Entities recommended that:

"The Department of Family Services continue to work towards developing and establishing an electronic case management system by which to collect, consolidate and analyze information on children and youth requiring and receiving protection and care services."

The Standing Committee further recommended that:

"The Department of Family Services work closely with other Government of Nunavut entities to address staffing needs at the community and regional levels."

The Standing Committee on Oversight of Government Operations and Public Accounts notes with some concern that progress in these areas has been slow. While Members appreciate that the ongoing development of the Department of Family Services case management system has faced a number of delays, it was noted that alternative methods of record keeping, including paper records, must be kept up to date. Other such challenges as hiring staff are hindered by the lack of staff housing. Ensuring workload standards are met is made more difficult due to the lack of appropriate office space. Accessing resources to address shortfalls depends on having the corporate knowledge and expertise to submit robust business cases. Members recognize that the Department of Family Services continues to face challenges in these and other areas. The Standing Committee strongly encourages other Government of Nunavut departments and agencies to work more collaboratively with the Department of Family Services to address these issues.

4. That the Representative for Children and Youth collaborate with the Government of Nunavut departments of Education, Family Services, Health and Justice to identify and implement specific ways to support parents and families in addressing issues related to the care and provision of services to Nunavut's children and youth;

Mr. Speaker, the "Message from the Representative" section of the 2019-2020 Annual Report focuses significantly on concerns related to the violence, physical and sexual abuse and neglect that far too many young Nunavummiut have been exposed to. The issue of abuse was addressed on a number of occasions throughout the committee hearings and it is recognized that much more must be done to address the serious and critical situations facing Nunavut youth and their families.

During the course of the hearing, the standing committee was given to understand that the Office of the Representative for Children and Youth is currently working on a systemic review of child protection services. It is anticipated that such issues as the oversight of foster homes and group homes as well as options for interventions and prevention of abuse will be examined during the course of the review. Members look forward to further discussions in this area, recognizing that open dialogue is an important step towards addressing the issue.

Members of the standing committee expressed a number of views with respect to the roles of parents and family members, as well as government decision makers and service providers, in ensuring that children and youth are safe and protected. The Standing Committee suggests that the Representative explore alternative outreach activities at the community level, including engaging directly with parents and families.

As part of its response to the recommendations from the Office of the Auditor General's 2014 report and the report of the Fourth Assembly's Standing Committee on Public Accounts, Independent Officers and Other Entities, the Department of Family Services developed its comprehensive *Quality Protects Action Plan*, which was most recently updated in 2017.

One of the Auditor General's recommendations stated:

"As we recommended in our 2011 audit, the Department of Family Services should actively engage parents and communities in developing strategies for keeping children safe."

The Department of Family Services' *Quality Protects Action Plan* included a number of action items to address this recommendation and the Standing Committee strongly encourages the department to re-visit the commitments that were made and evaluate what progress has been achieved to date, and table an updated action plan at the first opportunity in the next Assembly.

During the course of the standing committee hearings, significant recognition was also given to the important work being performed by the Umingmak Child and Youth Support Centre which addresses the needs of children and youth who experience abuse in a culturally relevant manner. Members expressed strong support for additional child advocacy services to be established in communities outside of Iqaluit, given that the need for these services far outweighs what the Umingmak Centre can currently provide.

5. That the Government of Nunavut finalize its comprehensive interdepartmental protocol for the coordination of services in respect of Nunavut’s children and youth.

Mr. Speaker, in May of 2019, the Office of the Representative for Children and Youth released *Our Minds Matter: A Youth Informed Review of Mental Health Services for Young Nunavummiut*, a report on the systemic review of mental health services for young Nunavummiut. That report contained a number of recommendations for the Government of Nunavut to address and improve mental health services for young people in the territory. The standing committee was pleased to note that several of the recommendations were agreed to by departmental representatives on behalf of the Government of Nunavut with corresponding commitments to enhance and deliver supports and training to address the mental health needs of youth.

For a number of the Representative’s recommendations, however, the status of the government’s response is unclear. The standing committee has been given to understand that an interdepartmental working group has been established to review and develop policies which will allow for information sharing, coordination of services and the incorporation of child and youth-specific programs into existing protocols across government. The standing committee strongly encourages the Government of Nunavut to continue its work in this area and to complete and clarify its responses to all of the recommendations included in the Representative’s report *Our Minds Matter: A Youth Informed Review of Mental Health Services for Young Nunavummiut*.

As noted in the “Looking Forward” conclusion to the Representative’s 2019-2020 annual report, a number of crises exist in the territory of Nunavut, including “overcrowded housing, violence and abuse, mental health and addictions and the high suicide rate.” However, as the Representative notes further “From ransomware to Covid-19, we cannot let these be the excuses that limit us from meeting the needs and supporting the rights and best interests of young Nunavummiut.” The Standing Committee further encourages such community-based initiatives as interagency groups to increase their efforts to address issues affecting children and youth in their communities.

The Standing Committee on Oversight of Government Operations and Public Accounts welcomes and supports the Representative’s efforts to hold the Government of Nunavut accountable through her advocacy on behalf of young Nunavummiut and their families.

Mr. Speaker, as the term of Nunavut's Fifth Legislative Assembly draws to a close, I would like to note a number of transitional issues for the next Assembly to take into consideration with respect to the Office of Nunavut's Representative for Children and Youth.

- Sub section 40(1) of the *Representative for Children and Youth Act* provides that the Legislative Assembly or one of its committees shall review the provisions and operations of the Act. While the review will be conducted in a manner determined by the Sixth Legislative Assembly of Nunavut, it is anticipated that the Office of the Representative for Children and Youth will contribute substantively to the process. Of note, section 4(1)(b) of the Act, which provides that the Representative may review any matter related to the death or critical injury of any child or youth, is not in force.
- Nunavut's Representative for Children and Youth has indicated that a report on her office's systemic review of child protection services will be completed by the end of the current fiscal year. Given the high rates of violence and sexual abuse across Nunavut, the Sixth Legislative Assembly of Nunavut may wish to consider striking a special committee to explore this issue in depth.
- The Office of the Auditor General of Canada has twice conducted audits on programs and services for children, youth and families in Nunavut. The 2011 report *Children, Youth and Family Programs and Services in Nunavut* included 20 recommendations for Government of Nunavut departments. The 2014 report *Follow-up report on Child and Family Services in Nunavut* contained 6 recommendations for Government of Nunavut departments. The Office of the Auditor General of Canada may wish to consider conducting another follow-up audit in this area which could contribute greatly to addressing issues that have been identified.

In closing, Mr. Speaker, the Standing Committee commends the Representative for Children and Youth for her effort and focus on advocating for the rights and interests of Nunavut's children and youth. Members recognize that there will always be some level of healthy tension between the Office of the Representative for Children and Youth and Government of Nunavut departments, especially when addressing sensitive topics. However, throughout the hearings the standing committee sensed a great willingness on the part of all participants to work collaboratively to improve communications and to support the working relationships that will lead to improvements in programs and services for young Nunavummiut.

With that Mr. Speaker, I move that the report of the standing committee be received by the House.

Thank you, Mr. Speaker.
