## Purpose

The Department of Community and Government Services (CGS) is pleased to present this report on the Government of Nunavut (GN's) procurement and contracting activities for the 2021/22 fiscal year.

## Objective

CGS is committed to ensuring fair value and ethical practices in meeting its responsibilities. This is accomplished through effective policies and procedures aimed at:

- Obtaining the best value for Nunavummiut overall;
- Creating a fair and open environment for vendors;
- Maintaining current and accurate information; and
- Ensuring effective approaches to meet the GN's requirements.

## Introduction

The *Procurement Activity Report* presents statistical information and contract detail about GN contracts as reported by GN departments to CGS's Procurement, Logistics and Contract Support section.

Contracts entered into by the GN Crown agencies, and the Legislative Assembly are not reported to CGS and are not included in this report.

Contract information provided in this report reflects contracts awarded and reported during the 2021/2022 fiscal year. CGS can not guarantee the accuracy of contract information reported by departments, however, CGS makes best efforts to verify the information and ensure departments are fully aware of the reporting requirements set out in the Nunavummi Nangminiaqtunik Ikajuuti (NNI Regulations) and applicable GN policies and procedures.

## Revised NNI Policy (Regulations)

In February 2021, a bid adjustment limit of \$500,000 was introduced that applied to Major Construction tenders and Design Build RFPs. This bid cap does not apply to the Labour portion of the contract.

On March 29, 2016, the Government of Nunavut approved a revised NNI Policy which came into effect as of September 7, 2017. The new NNI Regulations increased the total possible bid adjustments from 21% to 25%. This included an increase from 7% to 15% for 100% owned Inuit Firms. The statistics contained in this report include the new NNI Regulations.

This is a relevant historical policy change that does impact the comparison of historical data and trends.

### Report Overview

This report focuses on the distribution of contracts awarded to corporations, organizations and sole proprietors.

Charts and tables are used to illustrate the information presented.

CGS aims to enhance its reporting of the GN's contracting activities each year as part of its commitment to ensure transparency and accountability. Many factors can influence the comparability of data. Unusually high or low values for a given year in reported data can result from a blend of several external factors that may not necessarily be obvious to a reader including such significant items as annual variations in operating budgets or capital budgets, policy revisions and one time initiatives. Readers of this report should seek informed explanations respecting contributing factors before making judgments. Readers should not base judgments solely on the graphs and tables contained in this report and consider the many other reports and published program information made available by the GN as well.

When viewing such comparative information, it is important to note that certain factors such as planned changes in the GN's priorities from year to year can impact the annual results. For instance, a significant level of capital projects in one year would likely reveal a high level of Public Tendering which is the typical approach when awarding large value major works projects. A reduction in major works projects the following year, however, could reveal a related decrease in Public Tenders by value which is not necessarily indicative of any change in approach in the government's procurement and contracting practices. Therefore, it is important to consider the broader perspective and context before making conclusions when assessing the comparative information presented.

Each year there is a portion of contracting activities which relate directly to the GN's ongoing role in maintaining essential services and basic programs. Other contracting activities are closely aligned to the cyclical nature of the GN's capital spending commitments.

Major capital projects typically follow a period of planning which includes inception, planning and design phases prior to the period of intense construction activity. The following year would normally show a large reduction in contracting activity. Comparisons made across such years may reveal an unexpected change in the level of contracts which were competitively awarded as well as the relative percentage of contracting activities by type or method.

A year in which a number of large capital projects are entering their design phase would see an increase in the volume and value of spending activity on design contracts ("A/E"). Given that the design phases of capital projects are typically followed by construction, it would be logical to see corresponding increases in the number and value of major construction contracts awarded ("CON") in the following year.

Given that design and construction contracts are typically higher value contracts awarded through a Public RFP or Tender method, whereas other types of contracts are typically of smaller value awarded through an invitational process; a significant decrease in the infrastructure contract values with no change in the other contract values could imply an increase in Invited Tenders or Proposals even though there is no real increase in those activities.

Contract activities which relate to the GN's ongoing responsibility for maintaining basic services and safeguarding the health and welfare of Nunavummiut may warrant special measures to ensure prompt attention and immediate action. Depending on the nature, this may warrant engagement of expertise or necessary services outside the normal competitive process. This can occur where a delay would be injurious to the public interest, or where there is only one vendor available and qualified enough to perform the contract. Therefore, in a year in which the level of capital spending is low, the proportion of non-competitively awarded contracts may appear high even though there has been no underlying change to the GN's procurement and contracting practices.

Readers are therefore cautioned from making specific conclusions upon reviewing the comparative information presented. As the GN's primary Contracting Authority, CGS continues to monitor and assess annual indicators, enhance services offered to clients and client departments, and review its contracting activities regularly to ensure best practices across the GN.

## Sole Source Contract Observations

Sole Source contracting practices are monitored closely. The GN believes we get the best value for our money through competitive bidding processes, however, there are limited situations where the contracting regulations permit awarding contracts without competition. Section 3 of this report discusses the acceptable conditions for awarding contracts without competition.

The GN continues to review the contributing factors to contracts that have been Sole Sourced. CGS monitors the various types of contracts entered into without competition, and can offer strategic planning and other services to assist departments in decreasing their reliance on the Sole Sourcing methodology; especially where the permitted Sole Source criteria may not be met. For example, 'delay would be injurious to the public interest' is sometimes misunderstood, and the criterion 'there is only one party capable and available' is also sometimes relied upon without sufficient marketplace research or other appropriate data to support the request.

In 2019/20, the GN completed an RFP process for the territories requirements for Scheduled Medical Travel and Duty Travel. The process resulted in an award of two (2) contracts:

1. Calm Air for \$50,000,000.00
2. Canadian North for \$200,000,000.00

These two contract awards are reported as part of the statistics in this report. However, the actual expenditures are not part of the report. The expenditures are reported as exceptions.

### Not Included in These Statistics

Note: The statistical numbers in this report do not include four (4) large categories of contracts. Those are:

	2021/2022	2020/2021	2019/2020
1. Scheduled Medical Travel	\$ 84M (est.)	\$ 107M (est.)	\$ 101M (est.)
2. Fuel (PPD)	\$ 138M (est.)	\$ 172M (est.)	\$ 179M (est.)
3. Police and Laboratory Services	\$ 56M (est.)	\$ 54M (est.)	\$ 50M (est.)
4. Physician Services	\$ 28M (est.)	\$ 27M (est.)	\$ 23M (est.)

These four high value categories total approximately \$306 million in 2021/22. Medical Travel, Fuel Resupply and Physician Services are the result of a competitive process, Police and Laboratory Services is an extension of a previous contract with the RCMP. If we include these numbers, Sole Source contracts would value approximately 23% of total expenditures. Eliminating these numbers from statistical analysis allows for a more detailed and closer examination of Sole Source contracts.

The total value and volume of Sole Sourced contracts as a percentage of the total, had been largely decreasing since 2005/06. In 2020/21 we see a significant increase in the volume and value proportion. This is due to Sole Source contracts required to respond to the COVID-19 pandemic. See page 26 of this report for these numbers. In 2020/21 the volume of Sole Source contracts increased by 261% or 71 contracts, and the value of Sole Source contracts increased by almost 2000% or \$92.15 million.

In 2021/22 the value of Sole Sourced contracts decreased by 47% but the volume of Sole Sourced contracts continued to rise with a 17% increase. The impact of Sole Source contracts due to the COVID-19 pandemic continued throughout the 2021/22 fiscal year. The COVID-19 hubs all closed on April 11, 2022. If we use the numbers from the fiscal year 2018/19 as the “normal pre-COVID numbers”, the sole source volume for 2021/22 is over by 306% and the value is over by over eleven (11) times.

**Appendix A** outlines the definitions of terms and abbreviations.

**Appendix B** entitled *Sole Source Listing* provides a listing of all Sole Sourced contracts by value (> \$5,000) in ascending order.

**Appendix C** entitled *Contract Detailed Listing* provides a listing of all contracts (> \$5,000) and is presented by Contract Type in ascending Award Value.

The intent of these appendices is to enhance transparency of GN contracting and procurement practices by presenting meaningful and useful information on a timely basis. A threshold of \$5,000 has been established to provide focus on higher value contracts.

The contract details presented in this report reflect information recorded at the time of contract issuance. Information such as the award value represents the upper limit of a contract as established and agreed by the parties. It should be noted that the disclosure of proprietary information is typically restricted as the release of same may prove harmful to private sector interests and could expose the GN to legal and financial claims. CGS continues to operate under the advice and direction provided by the Department of Justice in this regard.

**Scheduled Medical Travel**

The detailed lists in Appendices B and C do not include the value of Scheduled Medical Travel awarded by the Department of Health. At the request of Members of the Legislative Assembly, we are providing a breakdown of dollar amounts spent in each fiscal year with each of the carriers for non-emergency medical travel. Note that all of these Medical Travel airline volumes are the result of a Competitive Public Procurement process, however, for the statistical analysis and tracking trends, they are not part of the analysis.

<b>Airline</b>	<b>2021/2022</b>	<b>2020/2021</b>	<b>2019/2020</b>
Calm Air	\$ 15,064,996	\$ 17,552,846	\$ 23,692,218
Canadian North*	\$ 31,245,322	\$ 53,174,218	\$ 19,777,245
First Air	-	\$ 14,756	\$ 15,354,413
Keewatin Air Limited	\$ 39,518,970	\$ 36,375,479	\$ 42,911,948
<b>Total:</b>	<b>\$ 84,929,289</b>	<b>\$ 107,117,298</b>	<b>\$ 101,735,824</b>

\* Reflects the airline merger of Canadian North and First Air in 2020/21.

**Fuel Re-supply**

The following companies were awarded contracts for the fuel re-supply:

<b>Company</b>	<b>2021/2022</b>	<b>2020/2021</b>	<b>2019/2020</b>
5140 Nunavut Ltd.	-	\$ 32,375	\$ 4,440

### **Contracts Awarded by Executive Council**

The Standing Committee on Government Operations and Accountability has recommended that Government record and disclose contracts entered into by Executive Council in this annual report. Government is able to confirm that there were **no** contracts awarded by Executive Council for the reporting period.

### **Negotiated Contracts**

During the fiscal year 2021/22 there were no negotiated contracts.

### **COVID-19**

COVID-19 – On or about the third week of March 2020, COVID-19 pandemic plans were rapidly unfolding. The establishment of travel isolation hubs were being organized however contract amounts were uncertain and up to March 31, 2020, invoices had not yet been received. COVID-19 contracts and figures start to be reported in the 2020/21 CAR and PAR reports. As will be further analysed throughout this report, the impact of the COVID-19 pandemic has altered many long standing contract trends. In general, the total volume of contracts has increased. The value and volume of Sole Sourced contracts have risen significantly, and the total value and volume of Purchase Order contracts is up.

In the fiscal year 2020/21, there was a total volume of 115 Sole Source contracts. Of that total, 34 or 30% were required to provide goods and services to battle COVID-19. The total value of the COVID-19 related Sole Source contracts is \$88.18 million. This accounts for 91% of the total value of Sole Sourced contracts. These COVID-19 Sole Sourced contracts include medical supplies such as masks, hand sanitizers, test kits, air transportation, and COVID-19 isolation hub hotels. The hub operators include hotel facilities, rooms, food, security services and transportation services.

### **Isolation Hubs and Sole Sourced Contracts**

During the weekend of March 20-22, 2020, GN staff began to put into place the required services, so that Isolation Hotels or Isolation Hubs could be established at air entry points into Nunavut. These hubs were being set up in Ottawa, Edmonton, Winnipeg, and Yellowknife.

As COVID-19 spread throughout Canada, most businesses sent staff home. Many hotels were closed, kitchen staff, cleaning and administrative staff were all sent home. Many hotels in the 4 hub cities were called to assist the GN but the common response was they could not assist because their locations were closed, and staff were sent home.

In Ottawa, a call was made to the Ottawa, Gatineau Hotel Association (OGHA). The OGHA sent a message out to all hotels in Ottawa/Gatineau. The first hotel that was able to offer the required services was the Marriot Residence Inn in Ottawa. They were able to have their staff return to work and offer 90 rooms. The security company that was servicing the hotel was the Arlington Group. The Arlington Group continued to offer the security services for the Ottawa hub as they were already contracted to provide security for the hotel.

In Yellowknife, the owners of the Explorer Hotel are also the owners of the Frobisher Inn in Iqaluit, NU. They are familiar with Inuit clients, and they offered the services of their hotel. The Explorer Hotel was using the security services of Twilite Logistics. The GN contracted Twilite Logistics to continue to provide the security required.

In Winnipeg and Edmonton, after many unsuccessful calls to hotels in Winnipeg, the Winnipeg Hilton was able to call staff back to work and offer services. They were also able to offer services in Edmonton through their sister company, the Holiday Inn. The Winnipeg Hilton and the Edmonton Holiday Inn were not able to provide the required security services and informed the GN that we would need to find a security company. The owner of the Arlington Group in Ottawa offered to work with security companies in Winnipeg and Edmonton, and offer a consistent security program in Ottawa, Winnipeg, and Edmonton.

By the end of day Sunday March 22, 2020, contracts and agreements were largely established to provide hotel rooms, 3 meals a day, security services and transportation in the four Nunavut entry points of Ottawa, Winnipeg, Edmonton, and Yellowknife. While the contracts for services were being put into place, procedures for tracking and registering travellers into the hub programs were being developed. Many health staff were reassigned as required. The administrative effort and procedures required for the Isolation Hub programs were critical and detailed.

These Isolation Hubs are all classified as Sole Source Emergency contracts. The normal procurement tendering process would not have allowed the Isolation Hubs to be established in the emergency time frame required. In most situations multiple vendors were contacted in each of the Hub city locations. In Ottawa, the entire OGHA was notified of the opportunity. Where possible, the established Hotel contractors for security, food, transportation etc. were maintained.

The first Isolation Hub guests entered the Hubs on March 25, 2020. These were the students that are part of the FANS program.

Since March 25, 2020, to February 2022, the Hubs had over 21,000 people complete isolation at the Isolation Hubs.

The Isolation Hubs had become an integral part of Nunavut's programs to protect Nunavummiut from COVID-19. Through the efforts of the Isolation Hub program, Nunavut remained COVID-19 free for the first eight (8) months of the pandemic.

Since March 25, 2020, the Isolation Hub operations continually evolved to improve the Isolation experience for Isolation guests. From the beginning, there were no established protocols or procedures in existence for the management of "COVID-19 Isolation Program". The overall goal of the Hub program was to provide the necessary supports to allow Nunavummiut to be able to successfully complete the required Isolation time so they could return home safely to their communities. The program has grown to include not only lodging, meals and security but also nursing services, cultural programs, mental wellness supports and expedited medical travel programs to enable specialist medical appointments.

#### **Critical Strategic Partners**

After the Hubs had been in operation for approximately 12 weeks, the GN reached out to the Qikiqtaaluk Corporation (QC) for assistance with the operations of the Isolation Hubs. The partnership with QC was a strategic success in the continued Hub operations. QC was able to provide significant administrative support to the program. These services included on-site Hub managers, interpreters, and Inuktitut speaking staff at all Hub locations. The strategic partnership between the GN and QC was a huge success and a key component of the Hub program delivery.

#### **COVID-19 Impact**

The COVID-19 Pandemic has had a significant impact on the fiscal years 2020/21 and 2021/22. The impact is largely seen in the value and volume of contracts and on the value and volume of Sole Sourced contracts. The COVID-19 Hubs were first opened on March 25, 2020, and closed on April 11, 2022. During the 106 weeks that the Hubs were in operation, approximately 23,000 travellers stayed at the Isolation Hubs.

## General Observations

This Procurement Activity Report (PAR) and the sister report, Contract Activity Report (CAR) are both composed of data from the same database. Contract information is reported from all departments of the Government of Nunavut. It is quite possible that as the contract information is entered into the database, that some human error will occur. The Department of Community and Government Services (CGS) makes best efforts to verify the accuracy and completeness of the dataset. We use various sources of external information (Freebalance, Requisition Log and Contract Management Listing) to verify the data. It is virtually impossible to assure 100% accuracy. However, even though it is a less than perfect system, we can rely on many repetitive, multi-year trends in the data analysis. This next section of the report will make a brief synopsis of the statistical results for the fiscal years 2019/20, 2020/21 and 2021/22 and will also outline some of the multi year trends.

The actual **volume** of contracts (number of contracts issued) decreased by 6.8% from 2020/21 to 2021/22 and increased by 13% from 2019/20.

The actual **value** of contracts increased by 30% from 2020/21 to 2021/22 and increased by 14% compared to 2019/20.

For 2021/22 the department with the largest **volume** of contracts is Health (HLTH) with 26% followed by Community and Government Services (CGS) at 25%. In the previous two years (2019-2018) of this report, CGS had the largest volume of contracts. In 2020/21 and 2021/22, we see the increased Health volume due to the Government of Nunavut's response to the COVID-19 pandemic.

For 2021/22, the department with the largest **value** of contracts is Health at 39% of the total followed by CGS with 31% of the total value of all contracts. This trend is consistent for the three years of this report.

In the last fiscal year 2021/22, the most common method of awarding contracts, by **volume**, is through Public and Invitational Tenders and RFP's (70%). This percentage was 71% in 2020/21, and 76% in 2019/20. The three-year average is 72%.

66% of the total **value** of all contracts is the result of some form of competitive bidding in 2021/22. This is a decrease of 19% from 2019/20. The decrease in the value of contracts from competitive bidding is due to the increase of Sole Source contracts in response to COVID-19. The three-year average is 69% value of contracts is a result of competitive bidding.

In 2020/21, the combined **volume** of Sole Source and Sole Vendor contracts is up by 46% (or 254 contracts) and the value of combined Sole Source and Sole Supplier contracts is up by 171%, or \$140 million. This increase is largely due to COVID-19.

### **Multi Year Trends – Sole Source and Sole Vendor Contracts**

Emergencies in communities will always require the use of Sole Source contracts. In 2020/21 and 2021/22, the Department of Health Sole Sourced many contracts in response to COVID-19. If not for the emergency contracting provision of the government contracting regulations, Health would not have been able respond to the emergency without delay. This illustrates the correct and appropriate application of the Sole Source criterion "delay would be injurious to the public interest" and is precisely why the regulations permit such a practical approach. In this report, a contract awarded under the emergency award provisions of the contracting regulations are identified as "SE" in Appendix C and are included with the Sole Source (SS) figures in the tables in section 4 (Sole Source contract distribution).

The contracting regulations also allow the Sole Sourcing of design services under \$25,000 (AE), and any other type of contract under \$5,000. This report does not analyse contracts under \$5,000, however A/E contracts under \$25,000 are identified as "SA" in Appendix C.

The final criterion in the contracting regulations where awarding contracts without competition is permitted, (SV) or (only one qualified vendor is capable and available) is more difficult to quantify, and therefore applied with the most subjectivity. CGS recommends that the best way to substantiate availability of qualified contractors and consultants, is to go to the marketplace and request competitive bids. Sole Source (SS) and Sole Vendor (SV) contracts often cancel each other out from year to year. As the volume of Sole Source contracts trends downwards, the volume of Sole Vendor contracts often increases. The values and volumes for these contracts are presented separately in the tables in section 3 and 4.

Sole Vendor (SV) contracts typically include orders for Alcohol Products (for resale), Corcan Office Furniture, Software Updates, Support Services and Intellectual Property such as Specialized Training Courses and Educational Materials.

A seventeen (17) year average (since 2005/06) indicates that 29.5% of the total volume of contracts, are not competitively tendered. The yearly percentage of contracts not competitively tendered has been decreasing from a high of 38% in 2005/06 to 22% in 2017/18. In 2020/21 and 2021/22, we see an increase due to the COVID-19 pandemic. We can expect this increasing trend should decrease in 2022/23.

For contracting type by value, we see some twelve year trends:

- Architectural & Engineering composes 1-5% of total value.
- Minor Construction and Maintenance composes 2-5% of total value.
- Purchase Orders make up 7-11% of the total value prior to 2020/21. However, in 2020/21 we see the trend end. Purchase Orders made up 37% of value. This eleven-year change is due to COVID-19 related contracts. In 2021/22 it is at 14% which is closer to the pre COVID-19 numbers.

For contracting type by volume, we see some ten year trends:

- Architectural & Engineering composes 1-2% of contract volume.
- Minor Construction and Maintenance composes 2-5% of contract volume.
- Air Charters compose 5-8% of contract volume.
- Purchase Orders had been relatively consistent at 26-30% of volume of contracts however, in 2020/21 they compose 37% of contracts. In 2021/22 they are back to 27%.
- Major Construction contracts compose 1% of volume.

Over the last twelve (12) years, the volume of Air Charter contracts has been relatively consistent at 5-8% of the volume of all contracts.

Since 2013/14 to 2019/20, roughly 14-17% of the volume of all Service Contracts has been for employee relocation moving services. In 2020/21 this has fallen to 10%, and in 2021/22 it has fallen to 4%.

For the last eleven (11) years Service Contracts and Purchase Orders combined represent the largest **volume** of contracts.

## Summary

### 1. All Contracts (> \$5,000)

The charts below “Government of Nunavut Contracting Value” summarizes the distribution of contracts awarded by value (or contract dollars) and volume (or quantity).

#### Government of Nunavut Contracting Value and Volume 3-Year Comparison

The *Procurement Activity Report* has been produced for the past seventeen (17) fiscal years. The two (2) charts above illustrate how the GN’s contracting activities have changed over the past three (3) years and are further supported by the details provided in the following table. The total value of contracts for 2021/22 shows a increase from the previous year of 30%. In terms of volume, the number of contracts issued in 2021/22 represents a 6.8% decrease compared to the number of contracts awarded in 2020/21. Both the value and volume exceed the 2019/20 figures.

The Average Contract Value shows a slight increase over the last three (3) fiscal years. An analysis of Appendix C compared to the charts presented in this report, and those from past fiscal years will indicate areas where spending has increased or decreased. The impact of COVID-19 will have an impact on all statistics throughout the reporting period of this report.

#### All Contracts

Type	2021/22	2020/21	2019/20
Number of Contracts	2,548	2,735	2,256
Total Value (Thousands)	\$ 634,379	\$ 488,964	\$ 558,253
Avg Contract Value	\$ 249	\$ 179	\$ 247

The chart below “Government of Nunavut Department Distribution – Value” summarizes the distribution of contracts by department.

**Government of Nunavut  
Department Distribution – Value  
2021/22**

The chart above shows the level of contract activities each department engaged in during the 2021/2022 fiscal year. Not surprisingly, those departments with responsibility for overseeing Nunavut’s infrastructure development, health, and emergency services engaged in higher levels of contract activities. Services are often needed in order to address the needs of Nunavummiut, fulfill departmental mandates and meet client service expectations and needs.

**Total Contract Distribution by Department – Value  
(Thousands)**

Department	2021/22		2020/21		2019/20	
Community and Government Services (CGS)						
	\$ 199,422	31%	\$ 128,026	26%	\$ 141,038	25%

In 2021/22, we saw an increase of 30% in the total value of contracts.

In 2020/21, we saw a decrease of \$69,288,000 or 12.4% from 2019/20.

In 2019/20, we saw an increase of \$8,529,000 or 1.6% from 2018/19.

Over the three (3) years of this report we see an increase in spending of 14%. Please reference the full list in Appendix C of this report.

In 2019/20, the Department of Community and Government Services awarded the Construction of a New Health Centre in Kinngait and Water Systems in Resolute Bay. The contracts account for \$39 million in the awards.

In 2021/22, the higher volume of contracting is in part due to the COVID-19 pandemic and contract activities to respond to the health emergency. These contracts have included services around the COVID-19 Isolation Hubs (security, hotels and transportation etc.)

The chart below “Government of Nunavut Department Distribution – Volume” illustrates the distribution of contracts by department.

### Government of Nunavut Department Distribution – Volume 2021/22

In the fiscal year 2021/22, the volume of contracts has increased by 6.8%.

In the fiscal year 2020/21, the volume of contracts has increased by 21.2%. This is a significant increase in contract activities. Much of this increase is due to contracts required to respond to the COVID-19 pandemic.

In the fiscal year 2019/20, the volume of contracts decreased by 18%.

Over the three (3) years covered by this report, we have seen a 13% increase in the volume of contracts. The fiscal years 2020/21 and 2021/22 are impacted by the COVID-19 contracting volumes.

The Departments of Health and Community and Government Services represent the highest level of contracting activity attributable to the Specialized Goods and Services required to meet the needs of Nunavummiut.

### Total Contract Distribution by Department – Volume

Department	2021/22		2020/21		2019/20	
Community and Government Services (CGS)	630	25%	618	23%	651	29%
Culture and Heritage (CH)	56	2	53	2	67	3
Economic Development and Transportation (EDT)	202	8	191	7	109	5
Education (EDU)	341	13	304	11	407	18
Executive and Intergovernmental Affairs (EIA)	31	1	18	1	16	1
Environment (ENV)	115	5	162	6	140	6
Family Services (FS)	254	10	290	11	117	5
Finance (FIN)	39	2	80	3	83	4
Human Resources (HR)	115	5	153	6	42	2
Health (HLTH)	653	26	730	27	504	22
Justice (JUS)	112	4	136	5	120	5
<b>Total</b>	<b>2,548</b>	<b>100%</b>	<b>2,735</b>	<b>100%</b>	<b>2,256</b>	<b>100%</b>

Most of the contracts for CGS support the ongoing operations of Government departments. These include “As and When” contracts for building and vehicle maintenance, snow removal, fuel, and a significant volume of contracts for ongoing Information Technology Services.

For the Department of Family Services, a majority of their contracts are composed of Specialized Residential Care Services for individual clients.

In 2021/22, we see a 6.8% decrease in the volume of contracts compared to 2020/21. However, the volume is still 13% over the 2019/20 pre-pandemic volumes.

In 2020/21, we see a significant increase in the number of contracts for the Department of Health. The increased volume represents an increase of 45% over the 2019/20 numbers. This represents a three year high.

In 2019/20, all departments except Education and Justice saw a decrease in the volume of contract activity. In 2018/19 the departments of Family Services and Finance saw the largest increase in contract volumes, 56% and 41% respective increases.

## 2. Contracting Types

The chart below “*Government of Nunavut Contracting Value*” summarizes the distribution of contract values by type.

**Government of Nunavut  
Contracting Types – Value  
2021/22**

The pie chart above shows that the categories of contracts that represent the largest spend are Service and Construction contracts. Appendix “C” lists all contracts over \$5,000.

In 2021/22 we saw the award of two significantly high-volume construction contracts. The French School addition in Iqaluit for \$27.9 million and the Kivalliq Seniors Long-Term Care Facility for \$47.4 million. Combined, these two contracts make-up 75% of the value of construction contracts awarded in 2021/22.

In 2020/21 we see the value of all contract type value totals has decreased with the exception of Purchase Orders. The value of Purchase Orders has increased by almost 400%. This is largely due to contracts put into place to respond to the COVID-19 pandemic.

In 2019/20 we see an increase in overall contract value by 1.6%. However, over the three (3) years of this report, the overall value of contracts has decreased by 11%.

In 2019/20 we see a three year low in the value of Major Construction. In 2019/20 the GN awarded contracts worth \$25.88 million for a new Health Centre in Kinngait and Water System Improvements in Resolute Bay, Kugaaruk and Chesterfield Inlet worth a combined total of \$13 million.

### CAR / PAR Air Charter Analysis (Volume)

Year	Courts	PPD	Dental	Wildlife	Covid	Total Volume
2013/14	18%	14%	11%	11%	N/A	138
2014/15	26%	19%	23%	5%	N/A	110
2015/16	19%	7%	13%	4%	N/A	162
2016/17	33%	5%	10%	8%	N/A	144
2017/18	16%	9%	15%	9%	N/A	135
2018/19	26%	10%	8%	8%	N/A	131
2019/20	30%	11%	7%	5%	N/A	142
2020/21	9%	18%	11%	11%	17%	126
2021/22	21%	15%	13%	10%	10%	126
<b>Average</b>	<b>22%</b>	<b>12%</b>	<b>12%</b>	<b>8%</b>	<b>14%</b>	

The chart above outlines the top 5 categories of requirements for Air Charters, with the addition of “COVID-19” in 2020/21.

The chart shows that over the 9 years, on average, the Department of Justice and the court system composes 21% of the volume of court charters, the Department of Community and Government Services (CGS) and the Petroleum Products Division (PPD) composes 12% of the volume, the Department of Health with Dental Services composes 12%, the Department of Environment with Wildlife makes up 8% and the Department of Health for COVID-19 operations composes 14% of the total volume of Air Charters.

### Contracting Types – Value (Thousands)

Type	2021/22		2020/21		2019/20

Purchase Orders (PO)	684	27	1,000	37	633	28
Service Contracts (SC)	1,449	57	1,295	47	998	44
<b>Total</b>	<b>2,548</b>	<b>100%</b>	<b>2,735</b>	<b>100%</b>	<b>2,256</b>	<b>100%</b>

Over the last fourteen (14) years, the volume of Air Charter contracts has been consistent at 5-8% of the total of all contracts. However, the value has varied significantly from year to year.

Contracts for Residential Care Services are awarded by the Departments of Family Services and Health. In total, approximately two hundred twenty-eight (228) contracts were for this service in 2017/18, and two hundred ninety (290) in 2018/19 and two hundred seven (207) in 2019/20, and 383 in 2020/21. In 2021/22 we see an increase of 43% to 415 contracts for Residential Care. This makes-up almost 30% of all Service Contracts.

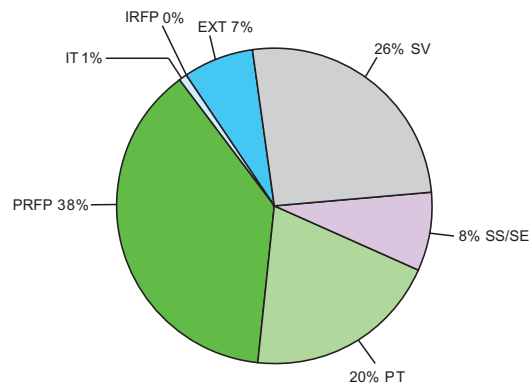

Another of the larger portions of Service Contracts is composed of moving services to move Government employees into and within Nunavut. A seven (7) year trend shows that Employee Relocation Services comprises approximately 15% of the Service Contract volume which is composed of a volume of approximately one hundred forty-two (142) moves in 2019/20. In 2020/21, the number of Service Contracts to move Government employees was down slightly to 132 contracts and 10% of the total volume of contracts.

In 2021/22 there were only 60 contracts for Relocation Services. This made up only 4% of the Service Contracts. This low volume is a direct result of COVID-19 impact on government operations and staffing challenges.

### 3. Contracting Methods

The chart below “*Government of Nunavut Contracting Methods – Value*” summarizes the distribution of contracting method by value.

**Government of Nunavut  
Contracting Methods – Value  
2021/22**

The definitions for the various contracting methods can be found in Appendix A of this report.

Public Tenders and Request for Proposals processes continue to represent the most significant contracting method employed by the GN. The GN believes that best value is received for goods & services through the public competitive tender process.

As in most jurisdictions, the awarding of contracts on a non-competitive basis is understandably limited to specific situations and must be appropriately justified and approved.

Compared to other award methods, the values for Invitational Tenders and Invitational RFP's appears small because only contracts under \$25,000 and Construction under \$100,000 are awarded through an invitational process. Contracts of a higher value must be awarded through a public process, therefore values for Public Tender and Public RFP's are higher.

The Request for Proposals process is generally recommended to enter into Consultant and Service Contracts. Tender processes are used for Goods, Construction and Maintenance purchases.

**Contracting Methods – Value  
(Thousands)**

Method	2021/22		2020/21		2019/20	
Extensions (EXT)	\$ 41,541	7%	\$ 9,853	2%	\$ 7,620	1%
Invitational RFP (IRFP)	299	-	526	-	1,241	-
Invitational Tender (IT)	8,142	1	4,583	1	5,998	1
Public RFP (PRFP)	241,502	38	184,892	38	367,189	66
Public Tender (PT)	125,156	20	66,981	14	94,273	17
Sole Source (SS & SE)	51,026	8	96,755	20	4,609	1
Sole Supplier or Vendor (SV)	166,714	26	125,375	26	77,323	14
Total	\$ 634,380	100%	\$ 488,965	100%	\$ 558,253	100%

Over the last seventeen (17) years of this report, the overall volume and value of contracts that are not competitively tendered (SS, SE, and SV) generally continues to decrease, as a percentage of the total. These contracts are classified as Sole Source (SS) and Sole Vendor (SV) Contracts generally continues to decrease. See trending figures below. The following figures represent the combined Sole Source and Sole Vendor (non-competitive) process.

In 2020/21, we see a change in the trend. COVID-19 conditions has necessitated the GN to Sole Source many contracts to battle the pandemic. Thirty (30%) of the volume of all Sole Source contracts were COVID-19 related. The total volume of Sole Source contracts is up by 46% to a 16 year high of 803 Sole Source contracts. This represents a 16 year high.

In 2021/22, the impact of COVID-19 on the volume and value Sole Source contracts continues. In 2021/22, 30% of the volume and 34% of the value of contracts is from Sole Source or Sole Vendor contracts.

In 2019/20, the value of contracts not competitively tendered was down by 14% and the volume is down by 15.5%, as compared to 2018/19. A closer look at the 2019/20 volume of Sole Vendor contracts shows that specialized contracts for Residential Care comprised 22% of the volume, 7% Liquor Orders, 9% for Information Technology License Renewals, 3% to Hamlets in Nunavut for services delivered and 6% for training courses.

A seventeen (17) year analysis shows, on average, the GN awards thirty percent (30%) contracts per year that are not competitively tendered. These represent 34% of contract values.

The GN needs to continue efforts to decrease the use of Sole Vendor contracting methods. The Government believes we obtain the best value for our public dollars through competitive procurement practices.

### Sole Source and Sole Vendor Contract Trends

The following is a list of combined Sole Source and Sole Vendor totals by volume and value over the last 17 years. These numbers do not include contract extensions. Many contract extensions are the result of an initial competitive procurement process.

Year	Volume	%	Value	%
2021/22	774	30%	217,740	34%
2020/21	803	29%	222,130	46%
2019/20	549	24%	81,932	15%
2018/19	650	23%	94,707	17%
2017/18	576	22%	50,105	9%
2016/17	564	23%	60,834	16%
2015/16	520	26%	56,000	14%
2014/15	471	24%	53,511	19%
2013/14	550	29%	38,402	11%
2012/13	475	26%	42,258	12%
2011/12	530	28%	61,462	17%
2010/11	570	31%	58,114	21%
2009/10	597	33%	55,480	24%
2008/09	576	38%	61,409	22%
2007/08	563	39%	51,432	27%
2006/07	403	38%	33,454	26%
2005/06	370	38%	33,095	37%

In 2019/20 the GN experienced two unprecedented events. The first was “Ransomware” in November 2019 and the second was in March 2020, COVID-19 pandemic. The ransomware event resulted in approximately 15 Sole Vendor contracts worth an estimated \$2.1 million. The beginning of the COVID-19 pandemic resulted in 5 Sole Source contracts worth approximately \$5 million. The impact of the COVID-19 pandemic is reflected in the 2020/21 and 2021/22 fiscal years.

Historically, the volume of not competitively tendered contracts as a percentage of the total volume decreased from 2007/08 to 2012/13. However, the volume increased by 3% in 2013/14. This is largely due to books and curriculum materials purchased by the Department of Education to support a new curriculum. These books and materials are protected by copyright. While the volume increased in 2013/14, the overall value as a percentage of the total decreased by 1% from 12% to 11%. In 2014/15 the volume continues to decrease however, the value had jumped to 19%. This is largely due to thirty-four (34) contracts awarded by the Department of Economic Development and Transportation worth an estimated value of \$16 million for Airport Operations and Maintenance and Aerodrome activities. All of these contracts categorized as Sole Vendor (SV). In 2015/16 we see the volume increased to 26% but the value decreased to 14%. In 2016/17, the total volume and value have increased. However, as a percentage of the volume of all contracts, the volume has continued to decrease. This trend continues from 2016/17 to 2019/20. For the four years, Sole Source/Vendor is relatively steady at 24%.

The chart below “Government of Nunavut Contracting Methods – Volume” illustrates the distribution of contracting methodology.

**Government of Nunavut  
Contracting Methods – Volume  
2021/22**

Generally, 60-70% (73% in 2018/19 and 76% in 2019/20, 71% in 2020/21 and 70% in 2021/22) of the volume of contracts are the result of a competitive process. Note that in some circumstances, extensions of contracts may be considered competitive process if they were originally part of a competitive process; therefore, not all extensions are non-competitive.

It is also worthwhile to note that more departments are using the services of CGS Purchasing, Logistics and Contract Support to award their contracts through a competitive Tender or RFP process. CGS’s Procurement, Logistics and Contract Support Services section continues to work with departments to decrease the use of Sole Source and Sole Vendor criteria to award contracts.

**Contracting Methods – Volume**

Method	2021/22		2020/21		2019/20	
Extensions (EXT)	27	1%	22	1%	22	1%
Invitational RFP (IRFP)	5	-	8	-	21	1
Invitational Tender (IT)	122	5	156	6	196	9
Public RFP (PRFP)	1,247	49	1,376	50	1,079	48
Public Tender (PT)	373	15	370	14	389	17
Sole Source (SS)	135	5	115	4	44	2
Sole Supplier or Vendor (SV)	639	25	688	25	505	22
Total	2,548	100%	2,735	100%	2,256	100%

Contracting without delay for competition, in emergency circumstances, where public safety and or continued service to public may otherwise be hampered, represents the proper use of the Sole Source contracting method. These emergencies are not predictable. Sole Source contracts are necessary for Goods and Services to avoid public harm.

Sole Source methods are of concern. Senior Managers and Directors need to continue to be conscious of this and plan to avoid Sole Source and Sole Vendor contracts where possible. GN Procurement Guidelines as well as the FAA (Financial Administration Act) clearly define the acceptable conditions for Sole Sourcing. Sole Sourcing is primarily a tool for dealing with emergency situations and public safety.

The next section of this report discusses the GN’s Sole Sourcing activities in further detail. A detailed review of Appendix B will indicate where GN departments are using Sole Sourcing to assist them with implementing their mandates.

#### 4. Sole Source Contract Distribution

As a procurement section, we strive to achieve the maximum value for the Government of Nunavut. This is only possible through the competitive, public bidding process. GN procurement guidelines as well as the Government Contract Regulations set out the acceptable conditions for awarding contracts without competitive bidding (Sole Sourcing). Procurement guidelines explain the GN contracting regulations and provide restrictions for when a contract can be awarded without competition.

Sole Source contracting is allowed where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the Goods, Services or Construction are urgently required, and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000, or the contract is any type of contract that will not exceed \$5,000 in value.

Section 4.3 (c) of the regulations is the easiest to implement because it requires only a 'yes/no' answer. Is the contract over \$5,000? If not, it does not fall within the 'under \$5,000 criterion'. Is it a contract for Architectural/Engineering Services under \$25,000? If not, then it does not fall within the 'AE under \$25,000' criterion.

Sections 4.3 (a) and (b) of the regulations, however, are more difficult to implement because they are subject to interpretation of what constitutes 'public injury' or 'capable and available'.

Section 4.3 (a) of the regulations can be somewhat tricky in that many contracting authorities believe that public well being, in addition to health and safety, are legitimate factors to consider when deciding not to go to competition. For example, it may be more beneficial to a community to Sole Source or Invite Tenders for Major Works contracts rather than Publicly Tender, when missing sealift can sometimes delay final delivery of a facility for 2 full years. In some cases, this may be a reasonable approach; however, it should not be the only alternative if project schedules fall behind due to a lack of strategic planning and project coordination.

In some situations, it is not advisable to issue a competitive call for tenders or proposals, by invitation or advertisement. In these situations, the delay caused by the tender or RFP process would be harmful to person(s) or end users of the good or service. These are emergency situations where, if the government doesn't act immediately, there will be some form of public harm or injury. Where there is a true emergency, such as the risks to water supply or a search and rescue operation, it is quite easy to recognize, and reasonable to implement. In a true emergency, there is no time for a competitive procurement process. This is not to say that all emergencies or public harm is strictly a health and safety hazard. Indeed, many situations call for government action to improve the emotional health and well being of the public as well.

The COVID-19 pandemic has represented a public emergency challenge where Sole Source contracts have been required to quickly respond to the changing and aggressive nature of the health crisis. These contracts have included Isolation Hub Services, Air Charters, Medical Supplies and many Service and Consulting Contracts.

Section 4.3 (b) of the regulations on the other hand, can be especially difficult to manage as it is open to wider interpretation and, therefore, susceptible to much broader use. There are many circumstances, however, that do legitimately fall within the s.4.3 (b) criterion, and these are true "Sole Vendor" situations. Situations involving licenses, software maintenance, patents and intellectual property or the purchase of a part component for equipment, (such as a valve or pump to repair a fuel delivery truck or fire engine, or plow parts for snow clearing equipment).

Situations that do not warrant a competitive process, because there are no other manufacturers or suppliers of the specific product, are true Sole Vendor circumstances. For instance, NorthwesTel is the Sole Vendor of land-line telephone services in Nunavut; QEC is the Sole Vendor of electricity. These are situations where there truly are no other service providers to engage in competition.

This is not to say that a 'Sole Vendor' situation applies when purchasing many commodities. In fact, when purchasing vehicles and or other products such as photocopiers and fax machines, etc., the GN must avoid the use of brand specific names. Requests for Tenders and Proposals must always indicate that the GN will accept bids for similar or equivalent products so long as they meet the quality and functional requirements that are established in the request.

In some cases, it may be perceived by departments to be reasonable to rely on this clause to maintain delivery of critical programs and services at levels expected by the public or internal client departments (specialized professional services; such as licenses, medical professionals and services). In many cases, departments need to bring in specialized skill sets to design programs to meet responsibilities owed to the public and oversee that program's delivery. Sometimes departments simply need to keep up with demand in delivering basic services to internal clients. In this situation, the interpretation of 'only one party capable and available' can be too broad, and the criterion is likely being relied upon for convenience in lieu of a potentially lengthy and complex RFP process.

The GN believes that best value is received for public dollars through open, fair and transparent competitive procurement processes. Furthermore, CGS believes that the best way to determine a supplier's qualifications, availability and value is to seek their proposals on solution, implementation and price, and to evaluate their past experience and qualifications against defined and measurable standards.

The public's satisfaction with a department's performance and service levels, in any given program at any given time, will always be an indicator of good value for public money. In all cases where a department is considering entering into a contract under s.4.3 (b) of the contracting regulations, CGS Purchasing, Logistics & Contracts Support is available to provide assistance on alternative contracting approaches. Where departments have already entered into s.4.3 (b) contracts, Purchasing recommends referring to the GN's Personal Service Contracts directive for further guidelines.

The chart below “Government of Nunavut Sole Source Contract Distribution – Value” summarizes the distribution of contracting method by department.

**Government of Nunavut  
Sole Source Contract Distribution – Value  
2021/22**

It should be noted that certain functions and responsibilities that are unique to certain departments lead to a higher propensity for this contracting method. Emergency situations with health and safety considerations or search and rescue may produce a need to enter into a contract quickly or limit alternatives or options for supply sources. Urgent situations involving the delivery of capital projects in the environmentally sensitive areas of sewage treatment, solid waste management, fuel spills and potable water have been contributing factors for Sole Source contracts on occasion. The arctic environment and a short Construction season serve to complicate project delivery and contracting options. Good planning and project management practices help to alleviate the necessity to rely on Sole Sourcing.

In 2020/21 the volume of Sole Source contracts has increased by 261% and the value has increased by 20-fold. This dramatic increase is due solely to the impact of COVID-19 related contracts. In 2021/22 we see another increase of 17% in volume, however the value has decreased by 47%. Looking forward to 2022/23, we should see these Sole Source numbers decrease significantly as the COVID-19 Hubs have closed (April 11, 2022).

**Thirteen Year Sole Source Trend – Decrease**

**Value of Competitively Awarded Contracts (not including contract extensions) as a percent of all contracts:**

07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
53%	62%	70%	76%	79%	86%	83%	77%	85%	82%	85%	80%	84%	53%	59%

**Value of Sole Source Contracts as a percent of all contracts:**

07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
25%	17%	14%	13%	9%	7%	5%	4%	2%	3%	2%	1%	2%	20%	8%

**Volume of Competitively Awarded Contracts as a percent of all contracts:**

07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
59%	60%	63%	63%	68%	71%	64%	71%	72%	75%	72%	73%	75%	70%	69%

**Volume of Sole Source Contracts as a percent of all contracts:**

07/08	08/09	09/10	10/11	11/12	12/13	13/14	14/15	15/16	16/17	17/18	18/19	19/20	20/21	21/22
36%	29%	23%	22%	20%	20%	14%	9%	6%	3%	2%	1%	1%	4%	5%

The overall thirteen (13) year trend, 2007/08 to 2019/20, shows a significant decrease in both the values and volume of Sole Source contracts, however in 2020/21 the value of competitively awarded contracts as a percentage of all contracts is only 53% and the volume of Sole Sourced contracts is at 4%. In 2021/22 the value of competitively awarded contracts is at 59% and the volume is at 5%. The last two years are impacted by COVID-19 Sole Source contracts.

In 2019/20 the value of competitively awarded contracts as a percentage of all contracts is 84% and the volume of Sole Sourced contracts is at an all time low of 1%.

Note that the “Sole Vendor” contracts are not included in this analysis. See section 3 of this report for analysis which includes “Sole Vendor” contracts. Extensions are a continuation of previously awarded contracts where the terms and conditions allow for the contract to be extended. These contracts are included in Appendix C.

### Sole Source Contract Distribution – Value

(Thousands)

Department	2021/22		2020/21		2019/20	
Community and Government Services (CGS)	\$ 11,076	22%	\$ 9,171	45%	\$ 3,283	71%
Economic Development and Transportation (EDT)	1,208	2	378	27	519	11
Education (EDU)	690	1	3,120	3	72	2
Executive and Intergovernmental Affairs (EIA)	21	-	15	-	27	1
Environment (ENV)	18	-	-	-	-	-
Family Services (FS)	1,348	3	14	-	420	9
Justice (JUS)	1,540	3	874	1	6	-
Health (HLTH)	35,125	69	83,183	16	282	6
Total	\$ 51,026	100%	\$ 96,755	100%	\$ 4,609	100%

In 2020/21, the Department of Health had the highest volume and value of Sole Source contracts when compared to all other GN Departments. This is usually not the case. The COVID-19 pandemic has caused this change in the long term historical trend. In 2021/22 we see that the Department of Community and Government Services now has the highest volume of Sole Sourced contracts.

In most years, the Department of Community and Government Services (CGS) has the highest number of Sole Source contracts. CGS is responsible for delivering many of the basic services of Nunavummiut (water, sewage, fire protection, etc.). In the event of emergencies, CGS plays a major role in delivering solutions. In these emergencies, Sole Source contracts are expected. These emergencies usually involve issues with infrastructure such as water and sewage or search and rescue operations.

CGS responds to a number of emergencies in the territory each year. Various search and rescue operations, water emergencies and other issues to ensure continuity of basic services. CGS was able to immediately and practically respond to all these emergencies due to the emergency contract provision of the GN contracting regulations. CGS was also able to quickly replenish depleted fuel supplies in some Nunavut communities due to the GN contracting regulations emergency sole source provisions.

The chart below “*Government of Nunavut Sole Source Contract Distribution – Volume*” illustrates the distribution of contracting methodology.

### Government of Nunavut Sole Source Contract Distribution – Volume 2021/22

Illustrated on the pie chart above on a proportionate basis in 2021/22, the Department of Community and Government Services issued the largest number of Sole Source contracts, followed by the Department of Health. As the chart illustrates, in 2020/21 the opposite was true.

### Sole Source Contract Distribution – Volume

Department	2021/22		2020/21		2019/20	
Community and Government Services (CGS)	58	43%	25	51%	25	57%
Culture and Heritage (CH)	-	-	-	2	-	-

<b>Total</b>	<b>135</b>	<b>100%</b>	<b>115</b>	<b>100%</b>	<b>44</b>	<b>100%</b>

## Appendix A

### Definition of Terms and Abbreviations

#### Terms

**“Goods”:** In this report, “Goods” means contracts for the purchase of Goods that are primarily entered into by *Procurement, Logistics and Contract Support Services* on behalf of Government of Nunavut departments, generally referred to as Purchase Orders.

**“Invitation”:** An Invitation is a contracting method where Tender or Request for Proposal documents are sent only to contractors or suppliers specifically selected to submit tenders or proposals.

**“Invitational Tender”:** An Invitational Tender (IT) are those requests for which tender documents are sent only to contractors or suppliers specifically selected to submit competitive tenders. For readers not familiar with GN contracting practices, please note that outside Nunavut, Invitational Tenders are generally referred to as Solicited Tenders.

**“Invitational Request For Proposal”:** An Invitational Request for Proposal (IRFP) are those requests which are sent to contractors or suppliers selected to submit competitive proposals.

**“Purchase Orders”:** In this report, “Purchase Orders” means contracts for purchase of Goods, primarily entered into by the Department of Community and Government Services on behalf of Government of Nunavut departments.

**“Public Tender”:** Public Tenders are those Request for Tenders which are publicly advertised. For readers not familiar with GN contracting practices, please note that outside Nunavut, Public Tenders are generally referred to as Invitational Tenders.

**“Request For Proposal”:** A Request For Proposal (RFP) has been defined as follows, “when the government knows what end result should be, but not necessarily how best to achieve it; therefore Government seeks *proposals* on methods, ability, and price”.

**“Sole Source”:** A Sole Source is best defined by setting out the criteria. The Government of Nunavut Contract Regulations, under the Financial Administration Act, allow Sole Sourcing of contracts where a contract authority believes, on reasonable grounds, that one of the following conditions is applicable:

- (a) the Goods, Services or Construction are urgently required and delay would be injurious to the public interest; or
- (b) only one party is available and capable of performing the contract; or
- (c) the contract is an architectural or engineering contract that will not exceed \$25,000; or
- (d) the contract is any type of contract that will not exceed \$5,000 in value.
- (e) in addition, Article 21 of the NNI Regulations provides for Sole-Source Contract Awards to Inuit Firms

21.1 Taking into account the objectives of the Agreement and subject to the Government Contract Regulations, a Contract Authority may award a Contract to an Inuit Firm without conducting a competitive Procurement Process.

21.2 The Government Contract Regulations, where applicable, and the following factors shall be taken into account when deciding to award a sole source Contract under section 21.1:

- (a) the need to build capacity for Inuit Firms in the region where the Contract will be performed;
- (b) the extent to which a sole-source Contract will contribute to community and regional economic development;
- (c) the nature and value of the goods or services or construction; and
- (d) the potential cost implications associated with awarding a Contract without administering a competitive Procurement Process.

**“Request for Tender”:** Tenders may be obtained by public advertisement or private invitation. It should be noted that, generally, the value and type of contract will determine the type of tendering to be used.

### Abbreviations Defined

#### Departments

CGS	Community & Government Services
CH	Culture and Heritage
EDT	Economic Development & Transportation
EDU	Education
EIA	Executive & Intergovernmental Affairs
ENV	Environment
FS	Family Services
FIN	Finance
HLTH	Health
HR	Human Resources
JUS	Justice

#### Contracting Types

AC	Air Charter
AE	Architectural/Engineering
CON	Construction
CS	Consulting Services
MC	Minor Construction or Maintenance
PO	Purchase Orders
SC	Service Contracts

#### Contracting Methods

IRFP	Invitational Request for Proposals
IT	Invitational Tender
PRFP	Public Request for Proposals
PT	Public Tender
SA	Sole Source – Architectural/Engineering
SE	Sole Source – Emergency
SV	Sole Supplier or Vendor

## Appendix B

### 2021-22 SOLE SOURCE CONTRACTS (> \$5,000)
